

Infant Jeba Surya. A

Frontend Developer

E-mail: infantjebasurya2.0@gmail.com

Contact No: 9677794485

Objective

Aspiring Front-End Developer with over 2 years of experience in creating dynamic, responsive, and user-friendly web applications. Proficient in **React.js**, **Redux**, and **JavaScript**, with strong expertise in building visually appealing interfaces. Passionate about crafting intuitive user experiences and collaborating with cross-functional teams to deliver high-quality solutions..

Profile Summary

- Experienced Front-End Developer with expertise in React.js, Redux, HTML5, CSS3, JavaScript, and Bootstrap.
- Proficient in using design tools like Figma to translate wireframes and prototypes into interactive UI components.
- Skilled in developing and consuming REST APIs to ensure seamless integration with back-end services.
- Adept at utilizing Git and GitHub for version control and managing collaborative development projects.
- Experienced in debugging, testing, and optimizing front-end performance for faster loading times and better user experiences.
- Familiar with Agile development methodologies, working effectively in fast-paced environments.

Technical Skills

- **Front-End Development:** HTML5, CSS3, SASS, JavaScript, Bootstrap, React.js, Redux, XML
- **Back-End Integration** : Spring Boot, REST APIs
- **Database Management** : SQL, Oracle
- **Version Control** : Git, GitHub
- **Tools & Frameworks** :Postman, Maven, Figma

Education

BCA (Computer Application) 2019-2022

Park's College of arts and science college, Tirupur.

Experience

Company : **NYL Technologies**, Chennai

Duration : Nov 2022 to Till now

Designation : Java Full Stack Developer.

Key Projects

Project 1: Starbucks Website

Technologies: HTML5, CSS3, Bootstrap, JavaScript, React.js, REST APIs **Duration**

: Dec 2022 – Jan 2024

Responsibilities:

- Developed interactive and user-friendly front-end pages for Starbucks' online ordering and rewards application.
 - Collaborated with designers to create visually appealing and consistent user interfaces.
 - Integrated REST APIs for payment gateway, loyalty program features, and real-time order tracking.
 - Optimized front-end performance using React.js hooks and component-based architecture.
-

Project 2: Investment Banking Application

Technologies: React.js, XML, CSS, JavaScript, REST APIs **Duration**

: Mar 2024 – Dec 2024

Responsibilities:

- Designed and implemented real-time dashboards for tracking financial transactions and market analytics.
- Built reusable components and integrated them with APIs to dynamically fetch and display financial data.
- Collaborated with back-end developers to ensure seamless data exchange.
- Enhanced UI performance through optimized rendering and debugging tools.

Main Projects

Project 1:

Project : Starbuck Website
Duration :Dec 2022 to Jan 2024
Programming Languages : React.js, Redux, Bootstrap, HTML5, CSS3, JavaScript, REST APIs

Responsibilities

- Developed the user interface using React.js, implementing component-based architecture for reusability and maintainability.
- Utilized Redux for efficient state management across the application, ensuring seamless communication between components.
- Designed responsive layouts with Bootstrap and custom CSS to ensure a consistent look and feel across devices.
- Integrated REST APIs with React components to fetch real-time data for features like menu listings, order tracking, and user rewards.
- Implemented React Router for client-side routing, enabling smooth navigation between pages like menu, cart, and user profile.
- Enhanced application performance by implementing lazy loading and code splitting with React Suspense and React Lazy.
- Used Axios for API requests, ensuring secure and efficient data exchange between the client and server.
- Conducted front-end performance optimizations, including reducing asset sizes, minimizing DOM re-renders, and leveraging browser caching.
- Collaborated with UI/UX designers to translate Figma prototypes into fully functional and visually appealing React components.
- Implemented secure login and authentication features using JWT and integrated role-based access control for admin and user roles.
- Tested front-end functionality using **React Testing Library** and **Jest**, ensuring high code quality and reliability

Project 2:

Project : Investment Banking
Duration :Mar 2024 to till now
Programming Languages : React.js, Redux, Bootstrap, HTML5, CSS3, JavaScript, REST APIs

Responsibilities:

- Built dynamic and interactive front-end components using **React.js** to handle complex workflows for trading, settlement, and risk management processes.
- Managed application state using **Redux**, ensuring smooth data flow and seamless user interactions across components.
- Designed responsive user interfaces with **Bootstrap** and **CSS3**, enhancing usability across desktop and mobile platforms.
- Integrated **REST APIs** into React components to enable real-time data visualization of financial transactions and market analytics.
- Utilized **React Router** for efficient navigation across application modules, such as trade history, risk analysis, and reporting dashboards.
- Implemented **React Suspense** and **React Lazy** to improve application performance through code splitting and lazy loading of components.
- Developed role-based access control and secure authentication features using **JWT**, ensuring compliance with financial industry security standards.
- Debugged and optimized React components to reduce re-renders and improve UI performance.
- Collaborated with the back-end team to design APIs and ensure seamless integration with frontend modules.
- Worked closely with designers to translate **Figma** prototypes into functional and visually consistent React components.

Declaration:

I hereby declare that the details furnished above are true to the best of my knowledge and belief.
