vaibhavchvn86

Summary

- Experienced Senior Software Engineer with extensive expertise in ReactJS and React Native, specializing in responsive UI development, API data binding, and dynamic application design. Proficient in creating versatile codebases across multiple platforms using ReactJS, SASS, HTML, CSS, Bootstrap, and Semantic UI, with a strong emphasis on Object-Oriented Programming (OOP) principles for modular, reusable, and maintainable frontend architecture. Adept at leveraging Redux for global state management and CryptoJS for secure data handling, ensuring high performance and security in applications. Demonstrates a strong ability to collaborate with cross-functional teams, manage complex projects, and deliver clean, robust, and scalable solutions.
- Expert in implementing complex functionalities including dynamic table binding, real-time data updates, and custom user interactions. Demonstrated expertise in managing permissions, handling navigation, and integrating third-party services such as Google Firebase for enhanced application features.
- Proven ability to collaborate with cross-functional teams, oversee software development projects, and deliver clean, reusable & bug-free code. Adept at using tools and practices such as GitHub, Jira, and manual testing to ensure high-quality software solutions. Committed to continuous learning and adaptation to new technologies to meet project needs and drive innovation.

Experience

Accenture Packaged App Development Senior Analyst https://www.accenture.com/	Oct 2024 - Present
Easyrewardz Software Services Pvt Ltd Senior Software Engineer https://www.easyrewardz.com/	Mar 2022 - Sept 2024
BridgeLabz Solutions Pvt Ltd Intern / Trainee	Jun 2021 - Mar 2022
Supreme Petrochem Ltd Graduate Engineer Trainee	Sep 2018 - Oct 2019

Skills

FrontEnd

React JS, React Native, JQuery, Javascript, Redux, Bootstrap, SemanticUI, MaterialUI, Tailwind, AntD, HTML, CSS, SASS, SCSS, OOP

Tools

Git, Jira, Matomo, Postman, Marvel, Figma, Swagger, Firebase

Education

Mumbai University Bachelor of Engineering	2014 - 2018
---	-------------

Awards

Promising Rookies Easyrewardz Software Services Pvt Ltd	17 Jan 2024
---	-------------

Projects

ReactJs

CRM Web UI Development

Project Names => [Clix](#), [Collecta](#), [RBL Rewards Portal](#),

[Microsite\(MaisonDglam\)](#), [SilentOcean](#), [Motherhood](#), [VikingClub](#), [HouseOfMG](#), [Zigly](#), [FortuneHotels](#), [BawaHotel](#), [RoyalOrchidHotels](#), [SOTCHotel](#), [ThomasCook](#))

Summary :

- **UI/UX Development:** Developed responsive UI designs and implemented data binding for new models using ReactJS, optimized for various platforms. Utilized Bootstrap, Semantic UI, Date Range Picker, and SASS to enhance the user interface. Designed and developed a dashboard for the Social Module, focusing on dynamic features and interactive elements, while adhering to Object-Oriented Programming (OOP) principles for modular and reusable frontend architecture.
- **Dashboard Development:** Implemented RESTful API data binding and dynamic responses, leveraging ReactJS, SASS, Bootstrap, Semantic UI, and Redux. Utilized React Hooks and core React principles to optimize component lifecycle management and performance. Incorporated features such as exporting table data in .csv format, using Bootstrap Tabs for navigation, and integrating Date Picker, Fusion Charts, and RE Charts with MomentJS for custom date-time formatting. OOPs was applied to ensure scalability and maintainability across components.
- **Interactive Elements:** Validated user inputs with JavaScript and regular expressions. Developed dynamic functionality for check/uncheck all checkboxes and created a responsive table with sticky headers and columns using Semantic UI. Implemented key features such as Nav Tabs, Validations, Date Picker, Bootstrap Modal, and user functionalities including Login, Logout, Registration, Referral, Terms & Conditions, FAQ, and About Program pages, ensuring reusable components through OOP principles.
- **Tool and Library Integration:** Integrated various tools and libraries, including Fusion Charts, SwiperJS, Date Range Picker, and Bootstrap features like Tooltip, Toaster, and Sticky Tables, to enhance functionality and visual appeal. Managed file and image uploads efficiently. Leveraged Redux for global state management to ensure consistent and predictable application behavior, and integrated CryptoJS for robust encryption and decryption processes, significantly enhancing data security. Applied OOP concepts to organize and manage third-party tool integration efficiently.
- **Versatile Codebase:** Created a versatile codebase that supports multiple websites through a single dynamic template, with layout and content dynamically adjusted based on a unique programCode. By employing OOP principles, this approach enhances scalability, reduces redundant code, and enables rapid deployment across different domains, making the system easy to maintain and expand.

React Native / Expo

Mobile App Development

Project Names => ERInteractApp, BurgerKing Chatbot

Summary :

- **React Native Development:** Developed responsive UI designs optimized for various device screen sizes. Integrated RESTful API data binding and utilized WebView and React Native Community NPM packages.
- **Chatbot SDK Development:** Developed a responsive Chatbot SDK for both iOS and Android, providing the SDK to the client for integration into their existing app. Implemented features such as copyToClipboard, image upload via camera and gallery using an image picker NPM, and created custom components including a swiper and checkbox based on specific requirements. Collaborated closely with cross-functional teams to ensure code quality and alignment with project expectations.
- **Project Setup and Configuration:** Worked with React Native CLI and Expo CLI, leveraging React Hooks and core React principles to enhance component lifecycle management and performance. Managed permissions for camera, microphone, external storage, and file/media access on app launch. Configured app logos, custom splash screens, notification icons, package names, version codes for Android, and bundle identifiers for iOS. Gained learning knowledge with Swift and Xcode for iOS development.
- **Navigation and Functionality:** Handled navigation using stack, including WebView and native screen redirection based on URL changes for logout or session expiration. Implemented features such as a back button handler, pull-to-refresh functionality, custom loading/activity indicators, and JavaScript injection in WebView. Managed cookies, caches, and Android hardware accelerations.
- **Data Management and Security:** Used Async Local Storage for data storage, encrypted sensitive information with CryptoJS, and employed Redux for state management. Implemented API calls using Axios and Fetch.
- **Firebase Integration and Deployment:** Set up Google Firebase Console for custom notifications, extracted Firebase tokens, and managed remote and background message handlers in the UI. Developed custom request bodies for Google Firebase API and integrated video call features using FCM notifications on a Jitsi Meet media server, including rendering calling screens and handling in-app sounds and vibrations.
- **Deployment:** Successfully deployed projects to Google Play Store and Apple App Store, ensuring compliance with permissions, privacy policies, and asset requirements. Built app bundles using EAS in .APK or .AAB formats.
- **UPI-based Payment:** Gained hands-on experience implementing UPI-based payments using deep linking to open GPay, PhonePe, Paytm, or the app tray for seamless transactions

Razor Page

Web UI Design (MVC/HTML)

Project Names => Popin Console, PopinWeb, StoreWidget, Bajaj Finserv, Collecta, RBL Rewards Portal,

Summary :

- **UI/UX Development:** Developed responsive UI designs using HTML5, CSS, Bootstrap, and Razor Pages within an ASP.NET MVC-based project. Implemented data binding in Razor Pages using jQuery for enhanced interactivity and user experience.
- **Login Portal Design:** Designed a comprehensive Login portal, including Sign-up, Login, Forgot Password, OTP, Error, and Success/Thank You pages using MVC architecture with partial views. Utilized Ruby, Bootstrap, HTML, CSS, jQuery, ReactJS, and JavaScript to create the user interface and implement validation messages for an enhanced user experience.
- **.NET Framework Upgrade:** Successfully upgraded the .NET framework from version 2.0 to 6.0 to improve application performance and scalability.
- **API Development:** Created and integrated APIs by fetching data from a MySQL database using stored procedures in .NET.
- **SCSS/CSS Management:** Utilized Ruby to convert SCSS into CSS, ensuring consistent and efficient styling across the application.
- **Dynamic UI Elements:** Created and managed various user interface elements, including Nav Tabs, Validations, Date Picker, Editor, Table, and both Single & Multi Selects. Handled data binding, navigation, and UI designs for Create, Edit, and View pages. Manipulated JSON data for dynamic table binding, displaying columns based on the JSON structure.
- **Authentication & Authorization:** Managed user authentication by returning the appropriate page upon successful login authorization or displaying an error page when authorization fails.
- **Data Handling & Integration:** Created methods to fetch data from PostgreSQL using functions and schemas, passing the data to .cshtml pages through ViewBag or TempData from the controller. Incorporated AJAX calls for dynamic data binding to enhance user interactions and provide a seamless experience.
- **Security & Encryption:** Implemented JWT token generation and encrypted data using the Rijndael encryption method. Additionally, performed URL encoding and decoding for parameters to ensure secure data transmission.
- **Tool and Library Integration:** Integrated various tools and libraries, such as Fusion Charts, SwiperJS, Date Range Picker, and Bootstrap features like Tooltip, Toaster, and Sticky Tables, to enhance functionality and visual appeal. Managed file and image uploads efficiently.
- **Template Editing:** Utilized Quill Editor for creating and editing templates for Email, SMS, and WhatsApp communications.
