EXPERIENCE

JavaScript Full Stack Developer

NeoSOFT Technologies

📅 09/2022 - Present 📍 Pune, India

- Successfully managed multiple projects with direct client interactions, ensuring timely delivery and high client satisfaction.
- Experienced in enhancing front-end design and user experience with libraries like Bootstrap and ng-zorro for Angular applications.
- Proficient in back-end development, with extensive knowledge of Node.js and Express for backend logic and MongoDB, MYSQL for data management.

PROJECTS

Unity Marketplace Loan Booking Journey - Unity Bank

A web application built for Unity Small Finance Bank, enabling users to seamlessly apply for loans online. This Angular-based front-end application provides an intuitive interface for users to explore loan options, submit applications, and track application status, creating a seamless and user-friendly loan booking experience. My role involved developing and optimizing the user interface to enhance engagement and accessibility, focusing on responsive design, efficient data handling, and seamless navigation. Additionally, I integrated third-party APIs to streamline data exchange and enrich functionality, ensuring a cohesive and efficient loan application journey for users.

- Skills: Angular 15, Bootstrap, Ng-Zorro, TypeScript, JIRA

Financial Technology Tool - OneFin

Contributed to front-end development for a banking tool that serves multiple banking institutions, focusing on features such as a workflow status module for loan applications, an Audit Trails module to track application changes with timestamps, and an automatic form schema creation module to streamline form configurations. Enhanced workflow performance by implementing infinite scrolling, virtual scrolling, and web workers, significantly optimizing page rendering. Additionally, improved overall codebase performance to ensure a seamless user experience across various banking platforms.

- Skills: Angular 15, Bootstrap, Ng-Zorro, Web workers, TypeScript, JIRA

Real Estate Services - Wasalt

Developed and optimized RESTful APIs for a dynamic property listing platform, ensuring efficient and seamless data interactions and efficient performance. Implemented strategies to improve the platform's search engine visibility, supporting the platform's visibility and accessibility to potential users. To ensure fast, accurate, and scalable data queries, I integrated Elastic Search, which allowed the platform to handle large datasets and deliver relevant search results quickly. Used MySQL for reliable data storage, ensuring data integrity and easy management of complex relationships within the platform's listings. Redis was incorporated for caching to reduce database load, significantly enhancing response times and supporting a seamless user experience during peak loads. Managed tasks and progress through JIRA and ensured secure access via JWT and HTTPS.

- Skills: Node.js, Express, TypeScript, JavaScript, JIRA, REST, MySQL, JWT, HTTPS

SUMMARY

JavaScript Full Stack Developer with 2 years of experience creating scalable, user-focused web applications. Proficient in Node.js and Express for backend development and Angular for responsive frontends, I develop robust RESTful APIs and dynamic interfaces that enhance performance and user engagement. Skilled in MongoDB and SQL for effective data management, with experience using tools like Jasmine, Postman, NgRx, and JWT to ensure quality, security, and scalability. A dedicated problem-solver and team player focused on delivering high-quality, maintainable code.

TECHNICAL SKILLS

Frontend

Angular **Jasmine** **Bootstrap**

Ng-Zorro **NgRx** **JavaScript**

TypeScript **HTML** **CSS**

Tailwind CSS

Backend

Node.js **Express.js** **TypeScript**

NestJS **JWT** **Postman**

Database

MongoDB **MYSQL**

DevOps

Docker

EDUCATION

Bachelor of Engineering in Information Technology

Savitribai Phule Pune University

📅 07/2018 - 06/2022 📍 Pune, India
