Chandigarh, Punjab

- Seeking a Full Stack Engineer role with 3+ years of experience as a Full Stack Engineer, building robust web applications. Committed to enhancing user experiences and collaborating with teams to achieve project goals.
- Skilled in fostering collaborative environments, demonstrating strong work ethics, and nurturing positive interpersonal dynamics within the team.

TECHNICAL SKILLS

NextJs | TypeScript | React.js | JavaScript (ES6+) | Redux | NodeJs | ExpressJs | MySQL | Context API | JQuery | AJAX | HTML | CSS | Tailwind CSS | Rest APIs | Git | JSON | Postman | AWS | Firebase | Socket.io | DSA

WORK EXPERIENCE

Illuminz | Software Developer, Mohali, Punjab

07/2024 – present

QuadShine Tech and Ventures | Full Stack Engineer, Imphal, India

06/2022 – 07/2024

QuadShine Tech and Ventures | Software Trainee Intern, Imphal, India

10/2021 – 05/2022

PROJECTS

Qfi-Community, Domain Tracker, Travalot, Illuminz Website, Elite Speaker

Qfi-Community: Developed video conferencing from scratch using the Agora library manually, while working on both the admin and user sides using Next.js, TypeScript, Tailwind CSS, and Redux, with a focus on performance optimization.

Domain Tracker: Developing domain management admin sites utilizing Next.js, TypeScript, Redux, Formik, and CKEditor to streamline domain tracking and administration.

Travalot, Illuminz Website, Elite Speaker: Responsible for bug fixes, adding new pages, enhancing functionality, and addressing any challenges in the development process.

EntireMart

EntireMart is an e-commerce platform specializing in food delivery, I was an integral part of the team developing the admin panel and user interface. For the admin panel, I utilized ReactJS with Hooks for dynamic interface design, implemented Redux for state management, integrated APIs for real-time data exchange and backend connectivity, and optimized performance for efficient management tasks. In user interface development, I designed a user-friendly interface using ReactJS, JQuery, AJAX and Hooks, employed Redux for client-side state management, integrated APIs for seamless data retrieval and display, and enhanced performance with lazy loading and caching.

On the backend, I developed server-side logic using Node.js and Express.js, managed databases with MySQL, utilized AWS S3 for storage, integrated Firebase for real-time data and authentication, and implemented real-time communication with Socket.io.

Epom Media

Epom Media is an Android application platform featuring a diverse array of content including Movies, Web Series, Songs, Old Collections, Award Winners, Shumang Leela, Theatre Plays, Kid Programs, Contests, and Events. ReactJS with hooks, AJAX, JQuery was employed to create a dynamic interface, allowing for smooth interactions and real-time updates. Redux was utilized for efficient state management, ensuring data consistency, and facilitating complex workflows within the admin dashboard. Additionally, Tailwind CSS was implemented for responsive design, guaranteeing accessibility across various devices and screen sizes.

EDUCATION

MTech | North Eastern Regional Institute of Science and Technology, Itanagar, Arunachal Pradesh. (2020-2022)

CGPA: 9.33 | CSE July, 2022

B.E | Manipur Institute of Technology, Imphal, Manipur (2016-2020)

CGPA: 8.39 | CSE September, 2020
