

PEDDIREDDY SREEKANTH

srikanth8016.p@gmail.com

Ph : 8317670364

PROFESSIONAL SUMMARY:

- Overall **2.1 years** of experience in web technologies with depth knowledge of HTML5, CSS3, Sass, Bootstrap, JavaScript, React js, Redux-toolkit, Material UI, Typescript, next js, graphql, jest with rtl technologies covering all phases of project development including business requirements analysis and implementation.
- Develop user-facing features using React.js library.
- Implement responsive designs and ensure cross-browser compatibility.
- Translate UI/UX designs into high-quality code.
- Build reusable components and libraries for future use.
- Optimize application for maximum speed and scalability.
- Proficiency in JavaScript and TypeScript, including DOM manipulation and the JavaScript object model.
- Stay updated with the latest ECMAScript standards and best practices.
- Debugging and troubleshooting skills for JavaScript-related issues.
- Strong proficiency in React.js and its core principles.
- Experience with popular React.js workflows (such as Redux or Context API).
- Thorough understanding of React.js and its core principles.
- Proficiency in handling state management using React Hooks or Redux.
- Experience with React Router for navigation within a single-page application
- Experience with Redux for state management in large-scale applications.
- Design and implement Redux store architecture.
- Manage application state efficiently using Redux.
- Debug and optimize Redux data flow for performance.
- Identify and address performance bottlenecks in frontend code.
- Optimize rendering performance and minimize time to interactive.
- Implement lazy loading and code splitting techniques to improve load times.
- Ensure accessibility standards are met by implementing ARIA roles and attributes.
- Test and debug for accessibility using tools like Axe or Lighthouse.
- Provide accessible alternatives for non-text content.

TECHNICAL EXPERTISE

Web Technologies	:	HTML5, CSS3, Sass, Bootstrap, JavaScript, React js, Redux-toolkit Material UI, Typescript, next js, graphql, jest with rtl
Development Tools	:	Visual Studio Code
Version Control Tool	:	Git

PROFESSIONAL EXPERIENCE:

Zensar Technologies(Payroll : INAT Technologies Private Limited), Bengaluru – Jan 2023 - Present

Project 2:

Project:	aliexpress
Environment:	HTML5, CSS3, Sass, JavaScript, React js, Redux-toolkit, Material UI, Typescript, next js, graphql, jest with rtl
Role:	Front End Developer

Project Description:

AliExpress is a global online retail platform founded by Alibaba Group. It connects consumers with sellers, offering a wide range of products including electronics, fashion, home goods, toys, and more, often at lower prices. The platform is popular for its direct-to-consumer model, allowing buyers to purchase products from manufacturers primarily in China. AliExpress caters to global markets with multiple language options and various shipping methods, offering an easy-to-use interface for shoppers worldwide. It is known for offering affordable products, bulk purchasing options, and frequent discounts

Responsibilities:

- Implement responsive designs and ensure cross-browser compatibility.
- Design and implement Redux store architecture using TypeScript.
- Manage application state efficiently using Redux actions, reducers, and selectors.
- Integrate Redux with React components to manage state transitions and side effects.
- Proficiency in TypeScript, including strong typing and interface declarations.
- Ensure type safety throughout the codebase, reducing runtime errors and improving code maintainability.
- Utilize React Hooks for managing state and side effects within functional components.
- Implement Context API for prop drilling avoidance and sharing state across components.

EDUCATION:

Bachelor of Technology in Computer Science, **JNTUA – 2023**
