PROFILE SUMMARY

Passionate Software Engineer skilled in HTML, CSS, JavaScript, React.JS, and modern web/mobile applications. Committed to continuous learning and delivering innovative solutions. Seeking to tackle challenging projects and contribute impactful, high-quality software solutions to drive organizational growth.

SKILLS

Programming Languages: C/C++, JavaScript, HTML, CSS, SQL.

Libraries & Frameworks: React.js, Redux, Bootstrap, Tailwind CSS.

Tools & Technology: VS Code, GitHub, JIRA, AWS CloudWatch, New Relic.

WORK EXPERIENCE

Associate Software Engineer | GlobalLogic Nov 2023 – Present

- Designed and implemented a Google CQO dashboard using JavaScript, React, Tailwind, and AppScript, enhancing optimizer quality 9% and increasing productivity 34%.
- Introduced new features such as hotlist and titlist to the Google CQO dashboard, significantly enriching user functionality and improving overall user experience.
- Optimized Google-bot crawled URLs with Regular expression and JavaScript.

Junior Software Engineer | RWS Moravia Sept 2022 – May 2023

- Responsible for Front-End UI design, utilizing HTML, CSS, JavaScript, Bootstrap, and React.js.
- Worked with React.js components, managed forms, handled events, implemented routing, Redux, and performed API data retrieval using the AXIOS library.
- Utilized Internal JIRA as the bug tracking system, actively debugged, and resolved application issues to enhance the user experience.

Software Engineering Internship | Eli Lilly Jan 2022 – July 2022

- Collaborated with the CLUWE IT Team to enhance UI features and review documents for UAT.
- Involved in business calls and closely worked with the test engineering team to ensure the quality of the product.
- Developed an application to check the status of CLUWE ISILON Tools, designed in PowerApps and used SharePoint for data sources.

PROJECTS

Prescripto | Online Doctor Appointment Booking System 2024

- Designed a comprehensive doctor appointment booking platform utilizing React.js for a seamless user experience.
- Implemented appointment scheduling and management features, allowing users to easily book, modify, and track their appointments.
- Ensured efficient state management and seamless data handling using Context API, optimizing performance and re-renders.
- Technologies:** JavaScript, ReactJS, HTML, CSS, Tailwind CSS, Context API.

Data Mining Virtual Lab Website (Summer Intern) | NIT-Trichy 2021

- Developed a website using HTML, CSS, and JavaScript to create a virtual lab for conducting data mining experiments.
- Implemented the DBSCAN algorithm and several others to simulate algorithm functionality and working steps.
- Designed pre and post-tests for each algorithm to assess student understanding and knowledge.

EDUCATION

National Institute of Technology, Tiruchirappalli 2022

Master of Computer Application

PMB Gujrati Science College, Indore 2019

Bachelor of Computer Science (IT)
