Profile

A logical & analytical thinker with excellent technical skills possessing **10 years & 2 months** of experience in software & database design, development & maintenance. Currently working with Tech Mahindra Ltd as Technical Lead.

Total experience: 10 years & 2 months

Education

B.Sc. (Information Technology) from Rizvi college, Bandra(W). Affiliated with Mumbai university. Graduated in June 2014 with Division 1

Skills

Programming languages with OOPs

- PHP 8

Frontend technologies

- HTML 5
- CSS 3
- Bootstrap 3
- JavaScript
- React
- jQuery
- AJAX

Testing tool

- PHPUnit

Server & cloud tools

- XAMPP
- Microsoft IIS
- Docker
- Jenkins
- Zend
- Linux
- Nginx
- Vagrant box

Cloud skills/Certifications

- AWS/Azure cloud
- Bot & RPA Development

MVC frameworks

- Laravel 11
- CodeIgniter 4

Databases

- PL/SQL - Oracle 12 C
- MySQL 5.7
- SQL/ TSQL
- SQLite

CMS frameworks

- Magento 2
- Wordpress 5

Web services

- REST

Versioning and other tools

- Tortoise SVN
- GIT
- Composer
- Putty
- MobaXterm
- Jira board for project management

Table tools

- Slickgrid
- Datatables

Certifications

- Microsoft certified **Azure** Developer Associate (AZ 204).
- **AWS** Technical Professional Accreditation certification.
- UiPath certified **RPA Developer** Foundation (v2021.10).
- Automation anywhere certified **Bot Developer**.

Awards & Recognition

- Honored with “**Pat on the back**” and “**Bravo**” award in March 2023 and March 2024 respectively from **Tech Mahindra Ltd**.
- Received “**Always go the extra mile!**” award from our **US based client (EMC)** in Oct 2019.

Career Highlights

An enthusiastic PHP developer with excellent technical skills, currently working with Tech Mahindra Ltd involved in developing Vodafone Germany telecom applications. Have also worked with multiple MNCs and worked with many India and international clients in developing PHP based application, carrying out data management activities for multiple countries like US, UK, UAE, Canada.

Some of my major roles include:

- Development of dynamic web applications using PHP / Oracle/ MySQL connectivity using Laravel, CodeIgniter MVC framework.
- Expertise in team leading activities like task allocation, helping junior developer technically, knowledge sharing activities, performing application performance and code review activities.
- Collaborate with client, scrum master and team lead and discuss feasibility of new implementation, challenges faced if any and sharing our progress updates.
- Experienced in conducting requirement analysis, coding & testing various modules/interfaces in software development life cycle.
- Expertise in writing PHPUnit tests cases for end-to-end automated testing.
- Expertise in preparing report specifications and database designs to support reporting requirements.
- Extensive experience in writing oracle, SQL and MYSQL queries, stored procedures, functions, and views.
- Experienced working on MS applications, especially on Excel (VLOOKUP, formulas).

Work Experience (10 years & 2 months)

- **Dec 2021 – till date (Presently working here)**

Technical Lead

Tech Mahindra Ltd

Tech Mahindra is a well-known IT service provider having its presence in 51 countries. Mentioned below are some of my core duties at Tech Mahindra Ltd.

- I was working for our offshore client Vodafone Ltd based in Germany. Vodafone is a leading telecom service provider in Germany and currently Tech Mahindra is handling some of their major applications.
- I was leading a Vodafone's application known as "C1 Parser". It is an automation tool developed using custom MVC framework where customers use to upload a zip file containing multiple JSON files. The tool was smart enough to validate, parse and save relevant data from JSON files to generate Vodafone's upcoming products and offers.
- As a technical lead, I was involved in every activity of this project. Daily checking with client and Jira boards for defects and new feature requests, discussing them with junior developers and project leads. As a technical lead I had to collaborate with QA, BA and the infra team as well, just to make sure nothing is blocking our sprint deliveries.
- Mentioned below are some of my daily activities in my current organization:
 - Task allocation and helping developers technically.
 - Working on major coding changes, which required more effort and attention.
 - Conducting code review activities to make sure code follows proper PSR2 coding standards and is safe and reusable to get merged in our main trunk branch.
 - Performing application performance activities and working on its improvements.
 - Developing complex database queries, stored procedure.
 - Apart from all this, most of my time I was involved in discussion with Vodafone clients, scrum master and team lead in discussing feasibility of new implementation, challenges faced if any and sharing our progress updates.

- **June 2019 – Dec 2021(2 years & 6 months)**

Associate Software Consultant

Systems Plus Private Ltd

Systems plus is an IT service company based in USA, UK, and India. The company provides various IT services and solutions to its clients in multiple sectors. Below are some of my core duties at systems plus.

- I was a part of an EMC project. EMC was our client based in the USA, which provides energy efficient lighting and technology solutions. We developed a tool using Laravel framework and oracle database. This tool helps our clients to create proposals, provide efficient solutions and get accurate estimation of budgets that can be shared with clients.
- Development of applications in Laravel MVC framework.
- Oracle query optimization for improving our tool's performance.
- Developing and updating PHPUnit test cases to automate testing of whole application in few minutes. Testing with PHPUnit was an initiative taken by me as our EMC project is a very huge application. So, before every sprint delivery, end-to-end testing would become a challenge for our QA team. After implementing PHPUnit we saved a lot of time utilized for testing.

- Code merging from development to support and UAT trunks using tortoise SVN and GIT repository.

- **June 2017 – June 2019 (2 years)**
Technical Associate (Software developer)
Exactus Corporation Private Ltd

Exactus Corporation is an OKS group company having its headquarters in Pennsylvania, USA. The company provides legal solutions, information & publishing solutions, healthcare, financial & accounting solutions. Below are some of my core duties at Exactus:

- Development of applications in CodeIgniter MVC framework & display dynamic data retrieved from MySQL database.
- Development of PHP scripts in core PHP as per user application requirement.
- Carrying out development work as per stakeholder's change request.
- Create web pages using appropriate html, CSS, JavaScript technologies as per requirement.
- Developing MySQL queries for report dashboard modules. Created stored procedures, functions, database, tables, views.
- Create and schedule CRONs for PHP scripts to carry out automated backend activities.

- **December 2014 – May 2017 (2 years & 6 months)**
Jr. Technical Lead
Justdial Ltd

Justdial is an Indian-based company, its core business is local search services in India, USA, UK, UAE, Canada. Below were my core duties at Justdial:

- Data analyzation, data matching, data management for multiple countries i.e. US, UK, UAE, Canada.
- Development of web applications in core PHP & CodeIgniter framework.
- Development & troubleshooting issues in PHP modules. data analyzation using MySQL.
- Developing complex reports: multi-functioned, leveled and grouped, summary functionality in main reports providing detailed drill down through on demand sub-reports, dynamic link labeling, complex functions, error handling & trouble shooting database related issues.
- Worked with multiple teams customizing, exporting, previewing, printing, and emailing reports, sharing status of all CRONs, confirming data is going live properly.
- Maintaining and updating monthly MIS files through PHP scripts and MySQL queries/procedures.

Projects Developed

- **Tech Mahindra applications**
 - C1 Parser tool: It is an automation tool developed using custom MVC framework where customers use to upload a zip file containing multiple JSON files. The tool was smart enough to validate, parse and save relevant data from JSON files to generate Vodafone's upcoming products and offers.
 - Omnibus BO tool: Once the zip file is parsed and published successfully. Client used our Omnibus BO tool, where they can see all the telecom products and offers which got inserted from corresponding JSON files. This tool was developed in Laravel framework.
 - OSE tool for tele sales team: It is used by tele sales team which have all customer details all offer that are applicable to them. It was developed in Magento.
- **Systems plus applications**
 - EMC tool: This is a very huge application we have developed for EMC. This application is developed in Laravel framework. Initially the tool was developed with MySQL database, but we later migrated to Oracle. This tool helps our client to create proposals, provide efficient solutions and get accurate estimation of budgets and reports that can be shared with the client. We can generate reports using this tool that can be accessed to different departments within the organization.
- **Justdial applications**
 - JD Contracts Update (Internationals): This application was developed for Justdial's IRE team to upload photos, logos & update contracts based on US, UK, UAE, Canada.
 - JD Contracts Update (India): This application helped Justdial national's staffs working for India to upload photos, logos & update local contracts.
 - JD CRON's: This application was majorly used by senior authorities to track whether the CRONs are working properly & uploaded photos, logos and data being entered by IRE team is going live on Justdial's website or not.
- **Exactus applications**
 - Leave/ HR Interface: A complete HR solution where normal users can apply leaves, can see their reports. Users with super rights can track productivity, leaves, HR requests from multiple departments & users.
 - Keycite Expansion Litigator Project: A smart application helping Legal Process Outsourcing unit to upload cases, assign them to LPO staffs, after submission the cases goes to quality control and audit team. Once approved cases are submitted to respective clients & reports are generated accordingly.
 - Docket Search Application: A tool which reads large uploaded word/.doc file and stores required data into the database. The applications were smart enough to validate the data as per admin protocols. These protocols were also defined by admin itself.
 - CTA Direct Application: An application where clients post their cases to be worked by Exactus LPO Team. The team in return work and submit the data back to the clients.
 - Pacer Application: Another application where Legal Process Outsourcing unit upload new cases, assigns them to LPO staff & generate reports.
 - CIS Tool: An Ideal billing tool developed for the accounts department to generate bills for multiple clients. Team leaders uploads work summary done by respective departments. All the uploaded data has been analyzed by the accounts team and a final bill is generated and sent to the clients.

- Lexsite.com: This is an official website of Exactus Corporation Private Limited. Here data related to changes in law and details about upcoming laws gets accessible to paid subscribers/ lawyers. Subscribers/ lawyers can register and avail themselves for paid updates. This website had an admin panel for backend team to add and edit website contents.
- Exactuscorp.com: Another official website for Exactus Corporation Private Limited.
- Tech support VPN request app: An interface where users can request and get approval from their managers for their machine's VPN access to work from home, the technology department will get intimidated accordingly if user's request are approved.

Other activities

- I love doing functional workout and other physical activities like running.
- I am a qualified finisher in 21 kms TATA Mumbai marathon, 2020.
- I love getting involved in social working activities like helping underprivileged kids with their studies, this includes visiting them weekly and teaching them Math, Science and teaching them computer basics etc. I love sharing my skills with people who are interested in learning.
