PERSONAL STATEMENT

Passionate frontend developer with hands-on experience in creating intuitive, user-centric web and mobile applications using React. Adept at building responsive, micro frontend and dynamic interfaces that enhance user experience, with a focus on clean, efficient code. Continuously learning and adapting to emerging technologies to craft innovative solutions.

EDUCATION

ATME college of engineering mysuru, Karnataka
BE Electronics and communicationsl, CGPA – 7.98/10

2017 - 2021

WORK EXPERIENCE

Crevavi Technologies, Mysuru

Feb 2022–present

- Developed multiple applications, including **Field Service**, **Work Order Assignment**, and **RefurbLog**, using **Thymeleaf** to deliver dynamic, user-friendly interfaces and efficient task management solutions.
- Automated workflows by integrating **Google Forms** with **Jira** via **Apps Script**, significantly reducing manual effort and enhancing team productivity.
- Contributed to the **R-IoT project** by building a responsive React front-end integrated with **REST APIs** for real-time IoT data visualization, leveraging **GitHub** for version control and **SonarQube** for code quality assurance.
- Designed and developed a professional **HubSpot-based** website with a focus on user experience, cross-browser compatibility, and performance optimization.

PROJECTS

- **Field Service Application:** Developed a comprehensive Field Service application using Thymeleaf, focusing on creating dynamic templates and ensuring seamless user experience for service management.
- **Work Order Assignment Application:** Designed and implemented a Work Order Assignment application using Thymeleaf, enhancing task delegation and tracking efficiency within teams.
- **RefurbLog Application:** Built the RefurbLog application with **Thymeleaf**, enabling streamlined product refurbishment logging and management.
- **Google Form & Jira Integration:** Automated workflows by integrating Google Forms with Jira using **Google Apps Script**, allowing seamless issue tracking and task creation, significantly reducing manual effort.
- **HubSpot Website Design:** Collaborated on the design and development of a professional website using HubSpot CMS, delivering an attractive and user-friendly interface aligned with branding goals.
- **R-IoT Project:** Contributed to the R-IoT project using React and **REST APIs**, developing a responsive front-end to handle real-time IoT data and enabling advanced data visualization. Integrated **GitHub** for version control and **SonarQube** to maintain code quality.

Skills & TECHNOLOGIES

- **Programming Languages:** JavaScript, HTML, CSS, Google app script,
- **Frameworks & Libraries:** React JS, Thymeleaf HTML, Redux, Tailwind, Cypress (testing), Bootstrap
- **DevOps & Cloud:** git, github actions
