## PROJECT DETAILS

---

### 1. p2p.creditfaircapital.in, ifa.p2p.creditfaircapital.in - Creditfair

**Team Size:** 6      **Technologies Used:** PHP, Golang, Angular, MySQL, AWS (EC2, ECS, RDS, S3, Amplify, Lambda, SNS, Cloud watch, WAF, IAM, VPC, API Gateway etc.)

**Overview:** This two are the consumer lending micro services architecture based applications which are developed using Angular as frontend and PHP, Go as backend technologies. This applications are mainly used for day to day consumer and peer to peer lending purpose by IFA, Investors, Borrowers and Sub brokers. This applications has approx. 6-7 internal modules to cater all lending's related functionalities as well as MIS and investment certificates provisions. I have designed and developed the complete AWS architecture as well as worked as lead full stack developer.

### 2. matter.in- Matter

**Team Size:** 12      **Technologies Used:** Drupal 9, PHP, MySQL, react.js, AWS (EC2, ECS, RDS, S3, Amplify, Lambda, SNS, Cloud watch, WAF, IAM, VPC, API Gateway etc.)

**Overview:** Matter is a hybrid application built with Drupal, PHP and react.js technologies. It is a website created for the digital marketing purpose of EV bikes created by Matter company. This application has complex react components as well as PHP form submission with client and server side validations both. As a lead full stack developer I have coordinated with all frontend, backend, and SEO and management team to deliver the project in given timelines as well as designed and developed the complete AWS architecture.

### 3. fulflex.com - Garware

**Team Size:** 12      **Technologies Used:** Drupal 9, PHP, MySQL, AWS (EC2, ECS, RDS, S3, Lambda, SNS, Cloud watch, WAF, IAM, VPC, API Gateway etc.)

**Overview:** Fulflex is a full-fledged Drupal application. It is a website created for the digital marketing of large variety products of Garware company. I am the sole developer who designed and developed this application from the scratch. This application has multiple modules and sub-modules to showcase different variant of products in details. As a lead full stack developer I have coordinated with all frontend, backend, and SEO and management team to deliver the project in given timelines as well as designed and developed the complete AWS architecture.

### 4. Proposal Tool - EMC

**Team Size:** 11      **Technologies Used:** Laravel Framework 5.6, Slickgrid.js, jQuery, Oracle, SOAP web services, Phpunit

**Overview:** Proposal Tool is developed for EMC users to record/perform all the phases to generate proposal for their esteemed clients as a part of their sales activities. This tool helps providing a predictable, reportable and transparent operational process to generate the proposal for the EMC client which ensures all processes involved are clear on objectives and outcomes every step of the way.

I have worked on application development using PHP Laravel framework, JQuery and slickgrid.js

### 5. SIM - Oberoi Realty Inc.

**Team Size:** 5      **Technologies Used:** Laravel Framework 5.6, JQuery, MySQL.

**Overview:** SIM stands for Systematic Inventory Management, which is and real estate inventory management application. Oberoi Realty users used this application to efficiently track the inventory status of different projects at same place.

I have worked on application development using PHP Laravel framework, JQuery and MySQL database schema

designing

## **6. Billing Sales - Axis Bank**

**Team Size:** 4      **Technologies Used:** Yii Framework v1, jQuery, MySQL.

**Overview:** DSA Billing & Pay-out, an employee portal for Axis Bank internal employees of consumer lending department. Some of the key modules included Personal Loan, Home Loan, Auto Loan, Loan Against Property, Overdraft Loan and Reverse Mortgage Loan etc. DSA Billing & Pay-out application provides various other facilities to calculate and compute pay out amount for each DSA on basis monthly business of disbursed loan amount.

I have worked on application development using PHP Yii framework, JQuery and MySQL database schema designing
