

Sreekanth Nakka

Mobile: (+91)6302652791

Email: srikanthnak7@gmail.com

Skills:

Frontend Development:

- **React.js (2 years):** Proficient in building dynamic, responsive, and user-friendly interfaces with React. Experienced in leveraging React hooks, context, and Redux for state management.
- **JavaScript | TypeScript:** Strong JavaScript skills with practical experience in TypeScript, enabling clean and maintainable code.
- **Angular:** Familiar with Angular framework, including component-based architecture, dependency injection, and routing for building scalable applications.
- **HTML | CSS | SCSS | Bootstrap | Material UI:** Skilled in creating modern, mobile-responsive web designs. Experienced with styling libraries, including SCSS, Bootstrap, and Material UI.
- **jQuery | Pug:** Proficient in jQuery for streamlined DOM manipulation and Pug for efficient templating.
- **Web Development Tools:** Hands-on experience with Webpack for module bundling, and JSON and REST APIs for data integration and dynamic content.

SEO Optimization:

- **On-Page SEO:** Skilled in implementing SEO best practices, including proper HTML structuring, semantic tags, meta descriptions, and alt attributes for improved search rankings.
- **Technical SEO:** Experienced in optimizing page load times, minimizing JavaScript and CSS for performance, and implementing schema markup for enhanced search engine visibility.
- **Content Optimization:** Proficient in keyword research and crafting content aligned with SEO strategies to improve organic traffic and engagement.

Version Control:

- **Git:** Proficient in using Git for version control, branching, and collaborative development, ensuring code stability and seamless integration across multiple environments.

API & Cloud Integration:

- **REST API | Web API | Azure Dashboard:** Experienced in connecting frontend applications to REST and Web APIs and managing deployments and integrations on the Azure Dashboard.

Project Management & Collaboration:

- **Jira:** Experienced in using Jira for agile project management, task tracking, and collaboration with cross-functional teams.

Website Builders:

- **Wix | HubSpot:** Skilled in designing, customizing, and deploying websites on Wix and HubSpot platforms.

Backend Development:

- **Intermediate Knowledge:** Node.js, Express.js, MySQL, MongoDB — capable of setting up basic backend services and managing databases.
- **Basic Knowledge:** Python — familiar with fundamental Python programming concepts for general scripting and automation tasks.

Educational Qualification

Course	Board/University	% Marks
Bachelor of Commerce in Computers (B. Com in Computers)	Acharya Nagarjuna University	68.7%
Class XII	Board Of Intermediate Education	89%
Class X	Board Of Secondary School of Education	70%

Professional Experience (2 Years)

Roles and Responsibilities	InovarTech Pvt Ltd	Software Engineer	2022 December 12 th to Till Date
	➤ Developing dynamic, responsive, and visually appealing user interfaces using React.js, JavaScript, and TypeScript. ➤ Building and styling complex UI components with HTML, CSS, SCSS, Bootstrap, and Material UI (MUI) for a seamless user experience. ➤ Leveraging jQuery and Pug for streamlined DOM manipulation, efficient templating, and enhancing website interactivity. ➤ Integrating REST APIs and Web APIs to display dynamic content and manage data effectively. ➤ Utilizing Git for version control to maintain codebase integrity and support collaborative development workflows. ➤ Applying Webpack for efficient module bundling and performance optimization in web applications.		

- Managing deployments and cloud integrations on **Azure Dashboard** and collaborating within **Agile** frameworks using tools like **Jira**.
- Creating and maintaining websites with **Wix** and **HubSpot** for business needs, including customization and responsive design.
- Familiar with backend development using **Node.js**,

Project Details:

Project Name - T-Mobile

Description: T-Mobile US, Inc., commonly shortened to T-Mobile, is a United States-based wireless network operator whose majority shareholder is the German telecommunications company Deutsche Telekom (DT). Its headquarters are located in [Bellevue, Washington](#), in the Seattle metropolitan area. T-Mobile is the third largest wireless carrier in the United States with 79.7 million customers as of the end of Q4 2018.

Microwave is the part of T-Mobile who looking of Telecom root licenses in US. Microwave team is responsible for Partial & Full cancellation Licenses, to Renew the Licenses & Buildout Proactive License and Buildout Nearing Expiration Licenses. To track all these functionalities for multiple level users Inovar has created a web application with name Microwave.

Wikipedia Search [Bellevue, Washington](#) Bellevue (/ˈbɛlvjuː/ BEL-vew) is a city in the Eastside region of King County, Washington, United States, located across Lake Washington from Seattle.

Team Size: 20

Role: Frontend Developer

Responsibility:

- Designed and implemented responsive user interfaces for the Microwave web application using HTML, SCSS, and TypeScript.
- Developed core functionalities with basic Angular features to manage and track telecom licenses, including cancellations, renewals, and proactive buildouts.
- Optimized reusable components and ensured cross-browser compatibility for a seamless user experience.

- Collaborated with stakeholders to gather requirements and deliver features for multi-level user access and management.

Tools Used:

HTML, SCSS, TypeScript, Angular (Basic Functions), Visual Studio Code, Browser Developer Tools

Project Name- MSAN (Microsoft Alumni Network):

Description:

The Microsoft Alumni Network is a platform where alumni from around the world can connect, collaborate, and contribute to creating a positive social impact. A public website was developed with a focus on responsive design and an intuitive user interface. Dynamic forms like *Alumni on the Move*, *Where Are They Now*, and *Alumni for Good* were created to gather data effectively. Galleries were implemented to showcase records such as podcasts, alumni profiles, and inspiring stories, complete with search and filtering capabilities. Payment processing was seamlessly integrated with Auth.net to handle transactions securely, while profiles and memberships were efficiently managed with strong relationships established between users, contacts, and payment systems.

Team Size: 10

Role: Frontend Developer

Responsibility:

- Designed and developed web pages and templates using HTML, CSS, and Bootstrap.
- Created responsive layouts ensuring compatibility across various devices and browsers.
- Built interactive UI components and features using JavaScript.
- Developed reusable components such as headers, footers, and navigation menus.
- Implemented page-level search and filtering functionalities using JavaScript.
- Styled forms and galleries for displaying dynamic content.
- Ensured a seamless user experience by applying modern UI principles.
- Collaborated on designing visually appealing and accessible web interfaces.

Tools Used:

HTML, CSS, Bootstrap, JavaScript, AJAX, Visual Studio Code, Browser Developer Tools

Project Name-Skolasti

Description:

Skolasti is a comprehensive learning development system designed to enhance educational experiences through a user-friendly interface and modern web technologies. The platform provides features like course management, video-based learning, quizzes, and interactive content, offering seamless navigation and intuitive design to improve learner engagement. Built with a focus on scalability and responsiveness, Skolasti ensures a consistent experience across all devices.

Team Size: 8

Role: Frontend Developer

Responsibility:

- Designed and developed interactive user interfaces using HTML, CSS, and Material-UI (MUI).
- Built and maintained dynamic components in React for a seamless user experience.
- Implemented state management using Redux to handle application data and improve performance.
- Collaborated with backend developers to integrate APIs for data-driven functionalities.
- Created responsive web pages to ensure compatibility across different screen sizes and devices.
- Optimized components for performance and accessibility.
- Participated in code reviews and ensured adherence to best practices for front-end development.
- Troubleshoot and resolved UI-related issues to maintain a high-quality user experience.

Tools Used:

HTML, CSS, Material-UI (MUI), React, Redux, Visual Studio Code, Browser Developer Tools

Project Name- InovarTech Website (Company website)

Description:

The company website was designed and developed to showcase the organization's core features, including *Careers*, *About Us*, and *Services*. The site provides an intuitive and engaging user experience, offering clear navigation and detailed content about the company. It is built with a focus on performance, scalability, and maintainability, leveraging modern web technologies.

Team Size: 1

Role: Full Stack Developer

Responsibility:

- Developed the website from scratch using Express.js as the backend framework and Pug for templating.
- Designed and styled the user interface with CSS, ensuring responsiveness and cross-browser compatibility.
- Created dynamic web pages to display information about careers, services, and company details using JavaScript.
- Managed and structured content using JSON files to store and retrieve data efficiently.
- Handled server-side logic, routing, and API integrations to provide seamless navigation across pages.
- Tested and optimized the application for performance, ensuring fast load times and minimal downtime.

- Maintained the project as a solo developer, ensuring high-quality coding standards and delivery.

Tools Used:

Express.js, Pug, CSS, JavaScript, JSON files, Visual Studio Code, Browser Developer Tools

Project Name - Scholarship Fund

Description: The Scholarship Fund is a 501(c)3 charitable, non-profit organization dedicated to honouring the sacrifices made by the children of America's service members. The organization provides support and recognition as their parents continue to serve and protect the nation.

The website was built using Wix, focusing on creating a visually engaging and informative platform to communicate the organization's mission, showcase stories, and enable donations and engagement.

Site link: <https://www.1stfscholarship.org/>

Team Size: 1

Role: Frontend Developer

Responsibility:

- Designed and developed the website using Wix's drag-and-drop builder.
- Customized templates and layouts to align with the organization's mission and branding.
- Structured pages to provide clear and accessible information about the organization, its goals, and how to contribute.
- Integrated donation functionality to support fundraising efforts.
- Ensured responsiveness and mobile optimization for seamless viewing across devices.
- Managed content updates and modifications to maintain relevancy and engagement.

Tools Used:

Wix Website Builder.

Strengths:

- Skilled in managing and working on multiple projects efficiently.
- Proactive with implementing innovative ideas.
- Organized, Competent and self-motivated.
- Enthusiastic to learn new things and team player.
- Excellent in research and troubleshooting skills.

Declaration:

I hereby declare that the information given above is true and correct to the best of my knowledge and understanding.
