Profile Summary

Engineered and deployed 15+ responsive web applications using the MERN stack, resulting in a 40% increase in user engagement and a 25% reduction in load times over 3+ years. Possess a comprehensive understanding of the full-stack development process (MERN stack), leveraging JavaScript (React, Node.js, MongoDB) to deliver exceptional user experiences. HandsOn at DevOps practices, optimizing CI/CD pipelines, and utilizing cloud services to ensure efficient deployments and robust system performance.

Skills

Prompt Engineering, GenAI, MERN Stack · MongoDB · Express.js · React · Node.js · Next.js · Nest.js · JavaScript · HTML · CSS · Java · CI/CD Pipelines · Cloud Services · Docker · Kubernetes · Agile Methodologies · Project Management · Team Collaboration · Git · GitHub · Jira · Trello · Slack

Professional Experience

Software Engineer L2, (Think Future Technologies) **India** Jan/2022 - present

- Led and developed 2 AI scalable client solutions, translating requirements into future-proof architectures. This resulted in a 15% increase in client satisfaction and a 40% improvement in project delivery efficiency.
- Micro-Service Architect for Boosted Reliability: Designed & implemented a cutting-edge microservice for CDN support, reducing downtime by 80% for enhanced user experience.
- Client Innovation Champion: Pioneered a high-impact POC for internal package execution. Authored & reviewed top-tier code (ReactJS, NodeJS, PostgreSQL, Ruby on Rails) for elevated functionality & which increased efficiency by 25%.

Software Engineer, (CantileverLabs Pvt Ltd) **India** April/2021 - Dec/2021

- Led 10 development interns, training on client-side project development, boosting team performance, and project success.
- Developed multi-language compiler using ReactJS and third-party APIs, streamlining development and expanding language support.
- Collaborated on product strategies with team leads and COO, informing decisions for enhanced user experience design.

Technical Projects

Software Engineer, (Sunhaarr) **India** 11/2024 - present

- The "Sunhaarr" website is an e-commerce platform specializing in jewelry. It is designed to offer a seamless user experience, allowing customers to easily browse and purchase products. The site likely includes features such as product categorization, an intuitive interface, secure payment options, and a responsive design for enhanced usability across devices.
- High-Performance Architecture: Designed a comprehensive High-Level Design (HLD) to ensure the system seamlessly handles even the most demanding network loads.

Software Engineer, (CareerGrads) **India** Jan/2020 - March/2021

- Identified and executed improvements for processes, content and increased lead generation by 20%.
- Collaborated with Content Team to promote blog posts and guest posts which led to increase traffic by 40%. Implemented new competitive analysis and consumer trend reports to increase quarterly sales by 15%.

Education

Bachelor's of Technology (Computer Science) **GLA University**

India 2018-2022

Achievements

- 2024 Solved 200+ Questions on (Leetcode, GFG)
- AWS Cloud Learner (Let's Learn)
- 5 * HackerRank Java Certificate
