Projects

Infosys (Shipping Company Portal)

Duration: December 2024 - Present

Technologies: ReactJS, HTML, CSS, JavaScript

Description: Designed and developed a portal for a shipping company to manage and track logistics, shipping orders, and customer details. Ensured seamless functionality and an intuitive user experience.

Roles & Responsibilities:

Implemented interactive UI components using ReactJS, adhering to best practices for maintainable and scalable code.

Developed and styled responsive web pages using HTML and CSS, ensuring cross-browser compatibility.

Enhanced user interaction by integrating dynamic JavaScript features for real-time updates.

Optimized the portal for speed and performance, achieving a 40% improvement in load times.

Collaborated with the backend team to integrate APIs for real-time shipping data.

Performed rigorous testing and debugging to deliver a stable and error-free portal.

OdinSchool (Website Enhancement)

Duration: September 2023 - November 2024

Technologies: HTML, CSS, JavaScript, HubSpot CMS

Description: Optimized the company website for better customer experience. Integrated HubSpot API for dynamic content, forms, and interactive features. Designed reusable code for scalability, applied SEO strategies, and enhanced page speed by 50%.

Roles & Responsibilities:

Collaborated with cross-functional teams to deliver high-quality results.

Developed payment processing capabilities and ensured end-to-end testing.

Designed and implemented layouts for improved UX.

Conducted cross-browser testing using Responsive Viewer, ensuring consistent quality across platforms.

Integrated analytics for user behavior insights and improved decision-making processes.

Accenture (JPMC Banking Application)

Duration: September 2021 - September 2023

Technologies: BlueJs, ReactJS, JavaScript

Description: Developed dynamic screens tailored to client needs, translating wireframes into functional pages. Implemented ADA compliance and analytics for accessibility and insights.

Roles & Responsibilities:

Debugged software issues, reducing bugs by 30%.

Created Karma test cases and integrated error-handling scenarios.

Collaborated with teams for sprint planning and backlog prioritization.

Enhanced customer satisfaction by delivering responsive and accessible user interfaces.

Incorporated feedback from usability testing sessions to refine features and improve overall performance.

Key Achievements

A/B Testing Implementation: Increased click-through rates by 15% through user preference analysis.

SEO Optimization: Achieved a 25% rise in organic traffic and improved page load time by 20%.
