Education

G.H. Raisoni College of Engineering Nagpur (CSE)	2016 - 2020
C.P and Berar College	2015 - 2016
Bhartiya Vidya Bhavan's	2013 - 2014

Summary

Resolute Software Engineer with 4.7 years of practical experience specializing in front-end technologies such as React and JavaScript. Proven record in developing innovative and interactive user interfaces. Possess ability in estimation domain projects, offering valuable insights into the complexities and prospects within this domain.

Note: Serving Notice Period 24th March 2025 LWD.

Skills

React JS | State Management | Front End | JavaScript | JSX | Hooks | React Bootstrap | Event Handling | Responsive Web Design | DOM Manipulation | Babel | jQuery | HTML | CSS | MySQL | SVN | Version Control | Agile Scrum Methodology | SharePoint Online | VS Code

Work Experience

NTT Data Software Analyst	July'20 - Present
1. Knowledge of developing web applications. 2. Designing and developing user interface components. 3. Developing reusable components and front-end libraries. 4. Optimizing components for performance across devices and browsers. 5. Managing state and props. 6. Collaborating with other team members. 7. Integrating user-facing elements with server-side logic.	

Projects

Area Management Tool

This project is developed to create a smart city for Daimaru city. This project consists of the following modules.

- Mapbox map API was used to create a world map.
- Note mode this mode was created to add notes for any place. And the comments added by the user were stored in the Dynamo DB table.
- Link mode this mode was used to add links for a certain place. A stretched link was created by that link and details were stored in the Dynamo DB table.

Estimator Tool

This project is developed to create estimates with precision and accuracy. This project consists of the following modules.

- Estimation Screen (Estimation Creating, upload Estimation related documents, Edit the existing estimation, User can mention the Risk factors involved, User logins according to the access rights).
- Users Screen (the purpose of this screen is to Add, update, and remove users. Also, users can be assigned roles as admin and estimator)
- Estimation Parameter Screen (This screen consists of the parameters used to create estimations. The parameters can be edited and changed).
