SKILLS

NodeJS | JavaScript | TypeScript | ReactJs | Redux | VueJs | Material UI | Git | GitLab | Jira |
Backend Development | CI/CD | AWS services (DynamoDB , Cognito , Lambda)

WORK EXPERIENCE

Software Engineer

Sep 2022 - Present

Suma soft pvt. Ltd | Pune, India

- 3.5 + years of experience in full stack development
- Designed and implemented maker checker flow for user creation and updation of third party applications.
- Strategically optimized the product's performance over 30% , resulting in a reduction of load time of the app.
- Architected and developed a backend and schema structure.
- Implemented single sign-in authentication,
- Developed grant or revoke requests through email.
- Improved the API's integrations structure which enhanced User Experience.
- Actively engaged with potential clients as the lead developer, providing technical guidance and support to drive client success which increased product adoption by over 20%.
- Implemented bulk user creation and deactivation on Azure AD.
- Developed an event-driven serverless integration framework using AWS Lambda.

Software Engineer

Sept 2021 - Sept 2022

Apponext System LLP | Navi Mumbai, India

- Developed Entegra System from the ground up, including full-stack web development and integration.
- Designed and implemented web UI using React JS, ensuring a dynamic and responsive user experience.
- Utilized Material UI to create modern, sleek interfaces that align with the application's design standards.
- Developed backend architecture, leveraging Node.js and other technologies to support Entegra application functionality.
- Designed and implemented Business Intelligence (BI) visualizations using JavaScript and Chart.js, enhancing data representation and decision-making processes.

PROJECTS

IUMS (Internal User Management System)

- **Tech Stack** : NodeJS , React JS , Express JS , MySQL, Sequelize ORM
- Manages all third-party applications used by clients through a centralized platform.
- Handles user creation, updates, and deletions based on individual user requests or senior personnel requests.
- Automates user provisioning and updates on both local Active Directory (LDAP) and Azure Active Directory (Azure AD).
- Ensures consistent and secure user account management across all systems.
- Facilitates seamless integration with third-party applications for improved user management and onboarding processes.

DRCFO

- **Tech Stack** : NodeJS , React JS , Express JS , MongoDB, Typescript
- Developed a NodeJS application which is a chain of Patient and doctor.
- Designed and developed creation of ABHA cards for patients.
- Manage appointments, prescriptions, diagnosis of all your patients from a single platform.
- Real time notification is easier for patients for upcoming appointments, tests and medicine consumption.
- Implemented image auto-compression to optimize loading speeds on web browsers, enhancing the overall user experience.

Audits Management System

- **Tech Stack** : NodeJS , React JS , AWS Lambda, DynamoDb, Cognito,S3
- SAAS application.
- Streamlines the planning, execution, and tracking of internal audits within the organization.
- Automates the process of audit scheduling, assignment, and tracking of audit tasks.
- Provides a centralized platform for auditors to manage and document audit findings, risks, and corrective actions.
- Tracks and stores audit trails, ensuring full compliance with industry regulations and standards.
- Facilitates reporting and analysis of audit results to identify trends, weaknesses, and areas for improvement.
- Supports secure communication and collaboration among team members and stakeholders throughout the audit lifecycle.
