Skills

- JavaScript (ES6+)
- TypeScript
- React.js
- CreateJS
- Git
- Problem-solving
- React Hooks
- Functional programming
- State management
- Redux and useContext

Education

03/2022

B.E:

Computer science

Mgm College of Engineering

Panvel

GPA: 7.83

Certifications

- [React - The Complete Guide \(incl Hooks, React Router, Redux\)](#)
- [ES6 JavaScript: The Complete Developer's Guide](#)
- [The Complete JavaScript Course 2023: From Zero to Expert!](#)
- [HTML5 Canvas Ultimate Guide](#)
- [HTML5 Animation to Your Web Pages Using CreateJS](#)

Rohan Humane

- Software Developer Band 1

Personal Summary

Accomplished Software Developer with a proven track record at MITR E-Learning Platform, specializing in React.js and TypeScript. Excelled in developing dynamic e-learning applications, enhancing performance by optimizing components, and fostering team collaboration. Demonstrates exceptional problem-solving abilities and a commitment to delivering high-quality features within stringent deadlines.

Experience

MITR E-Learning Platform - Software Developer Band 1

Andheri

12/2022 - Current

- Designed and developed dynamic, user-centric e-learning applications using React.js, TypeScript, and CreateJS.
- Worked on the Aksorn Simulation Project, creating interactive learning simulations tailored for student education.
- Collaborated with cross-functional teams to deliver high-quality features within tight deadlines.
- Enhanced application performance and optimized reusable components to improve efficiency.
- Improved and corrected existing software and system applications.
- Collaborated closely with team members to achieve project objectives, and meet deadlines.
- Provided support and guidance to colleagues to maintain a collaborative work environment.
- Completed day-to-day duties accurately and efficiently.
- Analyzed code and corrected errors to optimize output.

Projects

Food App: Developed a React.js food app to add, view, and manage dishes with dynamic user interaction. Used custom hooks, reusable custom components, and state management with Redux Toolkit.

Sorting Visualizer: This project is a sorting algorithm visualizer built using React and TypeScript. It provides an interactive way to visualize sorting algorithms like Bubble Sort, Insertion Sort, Selection Sort, Merge Sort, and Quick Sort. The application dynamically renders bars representing an array and animates the sorting process.
