

Total Experience

2.5 Years of experience in
Software Development

Work history

(Software Engineer)

july 2022 – Nov 2024

Concourse Solutions Pvt.
Ltd, Baner Pune- 411045.

Work Summary

- Experience as Software Developer.
- Experience developing dynamic web applications
- Experience in automating the processes using UI Path automation tools.
- Proficient Knowledge Angular, Node.js, Java and SQL database.

Educational Background

Master of Computer
Application
DYPIMCA, Akurdi, Pune
(2018-2021)

Summary and Accomplishments

- Developed and maintained full-stack web applications using Angular, Node.js, Java, and MySQL.
- Collaborated with cross-functional teams for seamless integration between frontend and backend components.
- Designed and implemented APIs in Java to ensure efficient communication between frontend and backend services.
- Optimized application performance, ensuring a responsive and user-friendly interface.
- Conducted code reviews and participated in agile development processes, contributing to continuous improvement initiatives.

Technical Skills

Frontend Technologies

Angular (versions 6 and later), HTML5, CSS3, JavaScript, Type Script, Bootstrap

Backend Technologies

Node.js, Core Java

Version Control

Git, GitHub, SVN

Databases:

SQL Server and MySQL.

Testing:

Unit Testing, Postman

Operating Systems

Windows 32bit / 64 bit

Project Profiles

Project Details	Responsibilities.
DigiRestro <i>July 2022 – Nov 2024</i>	- Designed, developed, and maintained full-stack web applications using Angular (frontend) and Java (backend), ensuring optimal functionality and performance. - Created and integrated APIs in Java, facilitating efficient communication between frontend and backend services. - Implemented dynamic, responsive user interfaces using Angular, HTML5, CSS3, and Typescript, adhering to best practices for UX/UI design.
Role Software Developer	- Developed server-side logic using Node.js and Java, managing MySQL databases and handling API requests to ensure robust and secure backend. - Conducted code reviews to ensure adherence to coding standards and best practices. - Maintained unit tests and collaborated with QA teams to identify, track, and resolve bugs.

Academic Project Details	Responsibilities
Art Gallery <i>Aug 2018 – Nov 2018</i>	- Designed and developed the Art Gallery application using PHP, JavaScript, HTML, CSS, MySQL, and Java, ensuring the smooth functionality of the platform from frontend to backend. - Created responsive and user-friendly UI components for artists and visitors to upload, view, and purchase artwork, ensuring a seamless experience across devices. - Implemented the backend logic for managing artist profiles, artwork listings, customer data, and billing records using PHP and MySQL, ensuring data integrity and security. - Designed and optimized the MySQL database, creating the necessary schema to manage various entities, such as artists, artworks, customers, and transaction history.
Role Software Developer
