Education

G.B. Pant Institute of Engineering and Technology

July 2018 – August 2022

Bachelor of Technology in Computer Science Engineering

8.1 CGPA

Experience

Persistent Systems

August 2022 – Present

Senior Software Engineer

Pune, Maharashtra

- Designed and implemented responsive user interfaces using React and Material-UI, ensuring seamless user experiences across various devices and screen sizes.
- Utilized TypeScript for type-checking and improved code reliability, leading to fewer runtime errors and easier maintenance.
- Assisted in deploying applications to AWS, gaining hands-on experience with AWS services such as S3, EC2, and CloudFront for hosting.
- Utilized Redux for effective state management, enabling efficient data handling.

Ensino Research And Development

June 2020 – August 2020

Full Stack Web Development Intern

Remote

- Learned and contributed to the development of web applications using React.js, JavaScript, and Node.js, gaining hands-on experience in front-end and back-end technologies.
- Developed responsive user interfaces with React.js, and backend functionality with Node.js.
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

Projects

Medium App | React, TypeScript, Node, Prisma, Postgres

- Developed a full-stack Blogging application using modern technologies, ensuring robust performance, security, and user-friendly experience.
- Built dynamic, responsive UIs with **React** and type-safe components using Typescript.
- Developed scalable backend services with **Node.js** and **Typescript**. Integrated Zod for schema validation
- Leveraged **Prisma ORM** for efficient database operations, including connection pooling for optimal performance.
- Managed a **Postgres** database for reliable data storage and retrieval.
- Implemented **JWT** for secure user authentication and authorization.

MovieMania | React, JavaScript, CSS, HTML

- Developed a comprehensive multi-page web application using **React** and the TMDB (The Movie Database) API to provide users with an interactive platform for exploring movies and TV shows.
- Successfully implemented advanced search, sorting, and filtering functionalities to improve content discover ability.
- Designed an intuitive, user-friendly interface using **Material-UI**

Sorting Visualizer | HTML, CSS, JavaScript

- Built using **HTML**, **CSS**, and **JavaScript** to create an interactive and visually appealing user interface.
- Implemented multiple sorting algorithms (e.g. Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, Quick Sort) to demonstrate their functioning visually.

Technical Skills

Languages: Java, JavaScript, C++, SQL

IT Constructs: Data Structures and Algorithms, OOP, DBMs, AWS

Front-End Technologies: HTML/CSS, Typescript, React, Next

Back-End Technologies: NodeJs, Express, Postgres, Prisma

Developer Tools: React, MongoDB

Code versioning tools: Git, Github

Achievement And Certification

- **Top Talent FY24** Award at **Persistent Systems**.
- Solved **550+** **DSA** question in Leetcode
- Solved 200+ questions in GeeksforGeeks
- AWS Certified: Cloud Practitioner
- Microsoft Certified: AZ-900
- Programming in Java (NPTEL)
