PROFESSIONAL SUMMARY

Experienced Software Engineer with 4.8 years of experience in the computer software industry, specializing in architecting and delivering innovative software solutions. Proficient in MERN stack development. Known for combining technical expertise with a passion for creating cutting-edge solutions that drive business growth and exceed client expectations

EDUCATION

Bachelor of Computer Engineering, Mumbai University 2014 - 2018

SKILLS

Technical Skills	React, Typescript, JavaScript, Redux, HTML, CSS, Node, Python, Git.
Soft Skills	Problem Solving, Critical Thinking, Adaptability, Leadership.
Tools	AEM (Adobe Experience Manager), Tableau, Splunk, Snowflake, SQLWorkbench, Citrix.
SDLC	Agile Method.

EXPERIENCE

Software Engineer II Aug 2021 - Present
Finicity, a MasterCard Company Navi Mumbai, Maharashtra

- Developed and maintained robust and scalable web applications using the Puppeteer and MERN stack.
- Design and implement RESTful APIs for seamless integration between front-end and back-end systems.
- Collaboration with front-end and back-end developers to define and implement innovative solutions.

Front End Developer Jun 2020 - Aug 2021
TeknoPoint Multimedia Pvt. Ltd. Mumbai, Maharashtra

- Designed and developed AEM building blocks including Templates, Components, Dialogs, API integration and workflows.
- Designed and developed web pages using AEM 6.5, React JS, JavaScript, HTML, CSS, JQuery, Ajax.

PROJECTS

Report Generation VOI/VOA (VERIFICATION OF INCOME/ASSETS): VOI/VOA was a transformative project aimed at enhancing the efficiency of the loan approval process for customers within financial institutions. My role involved implementing a streamlined approach to data scraping from a variety of institutions, ensuring the secure and confidential handling of partner information. By leveraging the CONNECT application, we significantly reduced the time required for asset and income verification, thus expediting the overall loan approval process. This project not only improved operational efficiency but also enhanced the customer experience by providing a faster and more

seamless service. Operating within the open banking framework, this project exemplified our commitment to embracing innovative technologies within the fintech domain. My contributions to this project included designing and developing user-friendly interfaces, collaborating with cross-functional teams, and ensuring adherence to best practices in software development. This experience honed my skills in project management, data integration, and partner confidentiality, all of which are valuable assets to me as a software engineer.

CEAT: Developed a dynamic web application using React JS, which involves utilization of components, props, and state management to create a responsive user interface. Role involved implementing key features such as user authentication, form validation, and data fetching from a RESTful API. To enhance the user experience, modern web development techniques such as CSS-in-JS for styling and Redux for state management were used. These technologies ensured a smooth and interactive user experience, allowing for efficient data management and a seamless interface.

Future Generali General Insurance: Developed a web application using JavaScript, HTML, and CSS for managing general insurance policies. Primary focus was on creating a user-friendly interface that streamlined policy management tasks, such as policy creation, renewal, and claims processing. To enhance the application's functionality and usability, implemented client-side validation using JavaScript. This ensured that users input valid data, reducing errors and improving data quality. Additionally, utilized JavaScript for dynamic content generation, which enabled the application to display relevant information based on user inputs or actions.

E-commerce website: Designed and developed a full-fledged e-commerce website using Django framework. Implemented user authentication, product listing, shopping cart functionality, and secure checkout process. Utilized Django's admin interface for easy management of products, orders, and user data.

EXTRA-CURRICULAR ACTIVITIES

- Participated as a speaker in a tech talk at MasterCard, discussing the Future of Virtual Reality in Education. Presented key insights and knowledge, engaging with colleagues and promoting learning within the organization.
- Provided technical support to staff and volunteers, helping them navigate and utilize the organization's digital tools effectively.
