## Professional Summary

Experienced in Angular development and UI/UX design, with a strong passion for crafting seamless, intuitive digital experiences. Skilled in simplifying complex challenges and developing user-centric interfaces that drive engagement and enhance usability. Adept at teamwork, clear communication, and managing client requirements to deliver tailored, high-quality solutions.

## Technical Skills

- Languages:** Proficient in Java, Python, JavaScript, and TypeScript for application development.
- Frontend:** Well-versed in building dynamic, responsive UIs with Angular and Bootstrap for seamless user experiences.
- Databases:** Skilled in SQL and MySQL, specializing in database design, optimization, and efficient query development.
- Version Control System:** Proficient in Git and GitHub for version control and collaboration.
- UI/UX:** Experienced in Figma, Marvel, Adobe After Effects, and Premiere Pro, with expertise in prototyping, UI/UX design, and video editing.

## Work Experience

### Watch Your Health Pvt. Ltd, Thane (Frontend Developer)

Feb 2024 – Present

- Developed interactive and responsive web solutions for the health domain using Angular, focusing on user experience, streamlined functionality, and seamless cross-platform performance.
- Collaborated with clients to design and build intuitive dashboards, responsive websites, and user-centric mobile applications tailored to their needs.

### Pinpoint Engineers (Python Web Developer)

June 2023 – Dec 2023

- Developing a robust document management website using Flask, Django, and MySQL, incorporating role-based access control to ensure secure multi-user access and efficient data management.
- Partnering with the team to revamp existing features, enhance system functionality, and implement modern design improvements for a more seamless user experience.

## Projects

### WellnessHub Applications

- Developed a web-based health management system to electronically track users' health records, store medical history, monitor health metrics, and predict potential future diseases. Built using Angular for the front-end and integrated with a secure back-end API.
- Ensured secure data storage and management with robust encryption techniques. Designed a responsive and intuitive user interface for seamless data input and visualization.
- Completed the project independently within two months.

## USGI

- Developed a responsive web and mobile application featuring three key sections: Wellness, Earn, and Redeem. Implemented essential health and wellness functionalities, including doctor consultations, step tracking, water intake monitoring, disease management programs, and an electronic health vault.
- Integrated a comprehensive diet and exercise tracker, lab test suggestions, and a health assessment test to enhance user engagement and overall well-being.

## Watania Admin Portal

- Implemented key features such as Rewards, Blogs, Webinars, and Policy Master, enhancing platform functionality and user engagement.
- Developed a robust administration module to manage user authorization, enabling seamless role-based access control and feature assignments for improved security and efficiency.

## Akumentics– PCOS Assessment

- Developed a responsive PCOS assessment platform for both mobile and desktop. Implemented a dynamic questionnaire that evaluates user responses to generate personalized scores.
- Integrated a PDF download feature for seamless access and sharing of assessment reports.

## Airbio Biosafety Solutions Website

- Crafted the front-end, enhancing usability and accessibility for laboratory professionals with intuitive biosafety solutions.
- Developed a detailed product page to effectively showcase features, specifications, and benefits.
