Dhanalakshmi College of Engineering, Coimbatore

Tamil Nadu

B.E in Computer Science and Engineering

Graduation Date: Jul 2022

WORK EXPERIENCE

NISYTECH DIGITAL INDIA PRIVATE LIMITED

Bangalore

Jan 2023 - Present

Associate Software Engineer

- Worked as a **Frontend Developer** on the **LPSRE** project, developing reusable components using **HTML, CSS, SASS**, and **Next.js** to deliver responsive and scalable web solutions.
- Developed and maintained **Python-based** web applications using **Django** frameworks
- Self-trained in **Storybook** and created component libraries using **React.js** for the **Cincinnati Financial** project, ensuring consistent and efficient UI development
- Utilized **JavaScript** and Sitecore for the **Stamford Health Medical Group project**, building and enhancing frontend components for improved user experience.
- Gained hands-on experience with **Sitecore XM Cloud**, creating and customizing components with React.js to streamline content management and improve site performance.
- Integrated **Press Ganey** with the Stamford website, developing a doctor profile rating system using **JavaScript** to enhance user interaction and accessibility, improving the overall user experience.
- Designed and developed the **Optimizely** platform from the ground up, implementing new pages, interactive forms, and dynamic tabs using **MVC .NET** to enhance content management and user experience.

WORKSBOT APPLICATION PRIVATE LIMITED

Chennai

Intern

Oct 2021 – Dec 2021

- Created a python Django project ‘Academiz’, an application which fetches and displays academic information about students.
- Created a web application where polls can be created and voted online. Admin can create polls with options and voters can vote and view percentage of result simultaneously.
- Gained hands-on experience with version control systems like Git, contributing to collaborative coding environments and improving team productivity.
