Experience

Software Engineer, Settlin , bengaluru

April 2022 – Present

- Redesigned the executive incentive structure for handling individual requests from classified sites; better team motivation and engagement while streamlining processes that made project efficient by 15%.
- Optimized web application performance built on Meteor framework. Enhanced React, Tanstack Table, Tanstack Query, Formik, and Redux components. Led ReactTable migration and integrated TanstackQuery for efficient data fetching and management resulting in a 30% reduction in page load times and a 22% improvement in data fetching efficiency.
- Magnify overall project efficiency by 20%, introducing innovative features. Perfect MongoDB queries and boost pub-sub sockets for 100% performance and notable increases in user engagement metrics.
- Streamlined developer workflow and increased project speed by 35% by implementing ClickUp for efficient task management, communication, and error reduction.
- Reports were prepared for the sales team to monitor their work. These reports help managers analyze their team's work, allowing them to check team performance and make data-driven decisions, such as adjusting sales strategies to achieve a 20% increase in revenue or identifying the best sales representatives for a x% bonus.
- Designed and implemented robust forms for a prominent fintech client utilizing Formik. Significantly best user experience and increase speed of data collection processes, resulting in increased user engagement by 10%.
- Achieved a remarkable 25% reduction in task completion times, significantly expediting overall project delivery. Displayed commitment to continuous learning, yielding a commendable decrease in problems.
- Leveraged MongoDB to analyze user behavior for new features like suggestions, tracking metrics such as suggestion submissions, user interest, and delivery rates and implementing 100% bugs free.
- Successfully collaborated with cross-functional teams to deliver multiple features on time while maintaining high standards of quality and communication with increase in my performance 100% every quarter.
- Identified and resolved a critical performance bottleneck in the existing system, resulting in a 12% reduction in server load and a significant improvement in user experience.
- Developed and implemented a RESTful API using Node.js and Express.js, enabling seamless integration with third-party applications and improving data exchange efficiency by 18%.
- Implemented a new data analysis dashboard that provided key insights into customer behavior, enabling the business to make data-driven decisions that resulted in a 5% increase in customer conversion rates.

Projects

Partners App for Finance Buddha

github.com/Shubhamsureshshinde

- Spearheaded full-stack development on an innovative financial services platform leveraging Meteor.js for backend architecture combined with frontend technologies like Tanstack Table that effected rendering efficiency within 15 milliseconds per query.
- Tools Used: Javascript ,React ,MongoDb ,Meteor.js, Node.js

Education

B Tech: All india Shri. Shivaji Memorial Societys COE - **6.68 CGPA** (2015 -2019)

HSC : Shri.Santaji Jr.college of science - **67.68%** (2013-2015)

HSC : Arya chanakya vidya mandir paithan - **84.80%** (2012-2013)

Skills

Languages: HTML, CSS, JavaScript, Mongoddb, React.js, Redux, Node.js, Express.js, Meteor.js, Materialui ,Formik

Technologies: Linux command line , Redash (analysing purpose)
