SUMMARY

Detail-oriented front-end developer with 4+ years of experience in building scalable, high-performance web applications using React, JavaScript, and modern UI frameworks. Skilled in responsive design, component-based architecture, and state management (Context API, Redux) to enhance user engagement and experience.

TECHNICAL SKILLS

Programming languages	: Javascript, Java, Python
Libraries / Runtime Env. / Frameworks	: React, Express, Bootstrap, Node, Tailwind CSS
Tools / IDEs	: Maven, Jenkins, IntelliJ, VS Code
Database Technologies	: SQL, MongoDB

WORK EXPERIENCE

Accenture

Insurance - Software Engineer

2024 - Present

- Worked on an opt-out feature for a split insurance component, reducing abandonment rates by 40% during new business and endorsement processes.
- Integrated presentation services and added a new insurance component, driving user engagement and effectively highlighting key offerings.
- Streamlined multi-module project deployment using Jenkins CI/CD pipeline (npm package publishing). Reduced time spent on repetitive deployment by 30%, allowing the development team to allocate more resources to feature enhancements and new initiatives.
- Identified, analyzed, and resolved recurring issues, improving customer satisfaction. Developed maintainable solutions to prevent future occurrences and ensure long-term application stability.

Finance - Software Engineer

2021 - 2023

- Engineered a robust application for executing daily ETL (Extract, Transform, Load) processes, encompassing Linux command execution, dynamic date manipulation, and real-time file verification against the current date.
- Owned a comprehensive sanity module responsible for orchestrating payment publication processes and conducting meticulous data validation across multiple SQL databases and MongoDB, ensuring seamless data flow and integrity across diverse database systems.
- Innovatively designed and implemented a user-friendly UI application, empowering users to effortlessly capture screenshots and collate pertinent data from multiple applications into a structured document format, enhancing efficiency and documentation practices.

PROJECTS

Midnight Musings | Social Media App | [Live Project](#)

2023

Tech Stack: React, JavaScript, Router V6, Context API, Axios, Vanilla CSS, Material UI, GIT

Engineered a vibrant social media app using React - developed a dynamic user feed with sorting options, enhancing the user experience and delivering up-to-date content and trending topics.

Night Angels | E-commerce App | [Live Project](#)

2023

Tech Stack: React, JavaScript, Router V6, Context API, Axios, Vanilla CSS, Material UI, GIT

Developed a fully functional e-Commerce platform with React that provides users with a seamless shopping experience, advanced filtering options on the Product Listing Page, enabling quick product discovery based on price, category, and ratings. Built wishlists and user-friendly Cart Management system for effortless shopping.

INTERNSHIP EXPERIENCE

VESIT Railway Cell

2019

- Envisioned, developed and deployed an android application VESIT Railway on Google play store, for applying for railway concession for students, which was previously done through their website.
- End-to-end UI to deployment, I worked in a team of two to successfully accomplish this project, got recognized at the annual event.

EDUCATION

Bachelor of Engineering in Computer Science
CGPI: 8.63 / 10

2016 - 2020
University of Mumbai
