PROFESSIONAL SUMMARY

Experienced Software Developer with 6+ years of expertise in JavaScript, React.js, and Node.js applications. Skilled in enhancing user experiences, automating workflows, and optimizing application performance. Adept at collaborating with cross-functional teams and clients to deliver high-quality, scalable solutions. Passionate about continuous learning, innovation, and staying updated with the latest industry trends.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Redux, HTML5, CSS3, Sass, Bootstrap, Material UI, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Testing: Jest

Tools & Platforms: Visual Studio Code, Git, Bitbucket, Postman, Jenkins, Jira

Version Control: GitHub, Bitbucket

Other: Agile/Scrum, Microservices, Cron Jobs

PROFESSIONAL EXPERIENCE

Sr. System Engineer – Infosys | Sep 2021 – Present

Project: Salon Booking Application (Client: Ulta Beauty)

- Developed and maintained web applications using React.js, Redux, JavaScript, HTML, and CSS, enhancing user experience.
- Optimized microservices architecture, improving data flow efficiency and reducing response time by 25%.
- Integrated RESTful APIs to streamline data exchange between services
- Conducted unit testing and debugging, leading to a 20% decrease in production defects.
- Analyzed business requirements and resolved client-reported issues, improving system stability

Project: Financial Reporting (Client: Walmart)

- Built a financial reporting dashboard from scratch using React.js and Context API.

- Worked closely with the UX team in Figma to refine UI/UX, ensuring pixel-perfect designs and seamless user interactions.
- Developed interactive data visualization components, enabling stakeholders to make data-driven decisions faster.

Project: Vertical Transportation (Client: TK Elevator)

- Implemented automated task scheduling using Cron jobs, reducing manual intervention.
- Developed and integrated new features into Node.js applications, leading to improved system performance.
- Developed multiple React.js components to enhance the application's mapping capabilities, with the integration of Advanced Marker for Google Maps being a key implementation that improved location tracking and visualization.

Sr. Associate – Wipro | Oct 2018 – Feb 2021

Project: E-commerce (Client: Bed Bath and Beyond)

- Enhanced post-purchase features, including order tracking and history, improving customer engagement.
- Implemented Redux for efficient state management and integrated RESTful APIs to ensure seamless data flow.
- Integrated third-party APIs to streamline order fulfilment and shipping, reducing processing delays.
- Collaborated with cross-functional teams to troubleshoot and resolve customer issues, improving resolution efficiency.
- Designed and maintained MVC architecture, optimizing application structure for better scalability and maintainability.

EDUCATION

Bachelor of Engineering (B.E.) – Technocrats Institute of Technology, Bhopal
Affiliated with RGPV University | CGPA: 7.0/10

ACHIEVEMENTS

- Recognized for significant contributions to critical applications in 2024, improving system stability and performance.
- Received Best Performer of the Quarter award at Wipro for consistently delivering high-quality solutions and resolving key technical challenges.
