SUMMARY

I am a highly skilled Software Developer with 3.6 years of experience specializing in building, optimizing, and modernizing web applications. Proficient in developing user-friendly, high-performance applications using React.js, Next.js, and modern front-end frameworks. Expertise in integrating RESTful APIs, implementing responsive UI designs, and enhancing application performance with techniques like code splitting, lazy loading. Strong experience in writing unit and integration tests to ensure code quality and maintainability. Adept at problem-solving and collaborating effectively within cross-functional teams. I am actively seeking new opportunities to leverage my skills in dynamic and growth-driven environments.

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript
- **Frontend Technologies:** ReactJS, Redux, Context API, React Router, Next.js
- **Styling:** HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap
- **State Management:** Redux, Context API
- **API Integration:** RESTful APIs
- **Testing:** Manual, Functional, Unit Testing, API Testing
- **Version Control:** Git, GitLab
- **DevOps & Deployment:** AWS (S3, CloudFront)

EDUCATION

Bachelor Of Engineering in Computer Science

University Of Mumbai

PROFESSIONAL EXPERIENCE

Software Developer (3.6Years) - Applied Cloud Computing | 2021 – Present

- Work closely with design, backend development teams, and other stakeholders to translate wireframes and mockups into interactive, responsive web pages.
- Designed and implemented user interfaces using ReactJS, HTML, CSS, NextJS, TypeScript & JavaScript.
- Managed state efficiently using Redux and Context API for complex applications.
- Provide support till deployment of code into production.
- Translate wireframes into interactive web pages using React.js and Next.js, optimize performance and SEO, ensure cross-browser compatibility, and write unit tests.
- Debugged and resolved technical issues efficiently, ensuring smooth application functionality.
- Understanding of RESTful APIs and data fetching techniques.

PROJECTS

Bandhan Mutual Funds - Distributor Portal

- Developed modules for login, registration, empanelment, and financial transactions (SWITCH, STP) using ReactJS and Redux.
- Integrated APIs for seamless data exchange between frontend and backend systems.
- Optimized page speed and enhanced code quality, improving the overall user experience.
- Collaborated with Business Analysts & cross-functional teams to track task progress.
- Mentored team members, providing guidance on best practices for coding and troubleshooting.

HDFC-Call Vault

- Revamped UI/UX for a banking application, enhancing user interactions.
- Integrated APIs for all application modules, ensuring smooth data transactions and real-time updates.

- Deployed the application on the client's server, ensuring proper configurations for stability and performance.
- Work closely with backend engineers to integrate frontend components with backend APIs and services.

Health App for ITECHO

- Developed responsive UIs for two separate applications for patients and clinicians using ReactJS, Material UI, and Redux.
- Deployed applications in different environments (UAT, Production) using AWS S3 and CloudFront for cloud hosting and content delivery.

SBI Bank -Insurance Policy Management System

- Led the development of a policy insurance application, ensuring a smooth and user-friendly interface.
- Integrated Node.js APIs for seamless data transactions and dynamic content updates.
- Styled the application using Tailwind CSS, ensuring a fully responsive and modern UI.
- Implemented ESLint to maintain clean and high-quality code standards.
- Worked closely with backend teams to troubleshoot and enhance API integration and system performance.

National Pension Sewa

- Developed the Withdrawal functionality for the National Pension Sewa application, optimizing the flow for end-users.
- Integrated APIs for all major functionalities to ensure smooth data transactions.
- Ensured responsiveness across all screens using SCSS and CSS, providing a seamless experience for users.
- Collaborated with backend developers to ensure successful API integration and application performance.
