Frontend Developer with 3+ years of experience creating responsive, accessible, and user-focused web interfaces. I specialize in React.js ecosystem development and have expertise in state management, performance optimization, and component architecture. Known for writing clean, maintainable code and delivering thoughtful UI solutions in fast-paced team environments.

Professional Experience

Analyst, Capgemini Technology Services India Pvt Ltd, 03/2022 – 03/2025
Account Opening Portal for a Bank – Bangalore

- Developed responsive web application using React 17, Redux Toolkit, and Tailwind CSS, resulting in a 20% increase in form submission rate
- Implemented a comprehensive state management architecture using Redux Toolkit, ensuring better predictability and debugging in multi-user forms
- Optimized page load time by 25% through custom form validation and code-splitting using React hooks and lazy loading techniques
- Collaborated in Agile development cycles with daily standups and branch-ups, utilizing Jira and Confluence for task tracking and documentation
- Reduced bug reports by 30% through the implementation of Jest-based unit testing for critical form components

Mobile Banking App for a Bank (Flutter Flow Hybrid) – Mumbai

- Designed mobile-first user interfaces using Flutter Flow, resulting in 25% faster screen rendering and consistent UX across Android and iOS platforms
- Integrated Firebase Authentication and Firestore for real-time data synchronization and secure user login, enhancing application security metrics
- Developed reusable component library using a common design system and style blocks, reducing development time for new features by 40%
- Participated in code reviews and implemented feedback to maintain high code quality standards across the mobile development team
