## Summary

Self-taught Frontend Engineer with 3+ years of experience in React, Next.js, and UI/UX. Started with C, DSA, and game development but shifted to web due to hardware limits. Built multiple projects, tackling both frontend and backend challenges.

Faced setbacks—first project got canceled, resolved deployment issues & improved CI/CD workflow, struggle with project timelines, and working Solo development made projects time-consuming, now improving collaboration. Despite mistakes, I continuously learn and adapt, improving my efficiency, problem-solving, and planning skills to become a specialist software developer.

## Skills

|            |                    |             |              |
|------------|--------------------|-------------|--------------|
| Html       | Seo Oprimization   | Postgress   | Tailwind Css |
| Css        | Ui/Ux Design       | Drizzle Orm | Shadcn       |
| Javascript | Restfull API's     | Figma       |              |
| React      | Version Controll   | Nodejs      |              |
| Nextjs     | Team Collaboration | Typescript  |              |

## Experience

React Developer , Destrier , June 2024 - Febuary 2025  
Kolkata , India

- Functional Dashboards: Developed interactive, data-driven dashboards with React & Next.js.
- Modern UI Development: Used the latest libraries like ShadCN and Tailwind CSS for sleek, responsive designs.
- Advanced Forms & Tables: Built complex forms with React Hook Form and dynamic tables using TanStack Table.

React Developer , Fortmindz , March 2023 - May 2024  
Kolkata , India

- Authentication & Authorization: Implemented client-side auth in React, server-side auth in Next.js (NextAuth, middleware), and integrated OAuth with Supabase/Firebase.
- Performance Optimization: Used debouncing, throttling, useMemo, useCallback, modern caching in Next.js, lazy loading, and code splitting
- Full-Stack Integrations: Worked with Supabase/Firebase, Developed and consumed REST & GraphQL APIs for scalable applications, and integrated Stripe/Razorpay for payments
- Project Architecture: Followed clean code, functional programming, atomic design, and TypeScript best practices.
- SEO & Optimization: Enhanced SEO with SSR/SSG in Next.js, meta tags, OpenGraph, and structured data.

HTML Developer , Fortmindz , Febuary 2022 - March 2023  
Kolkata , India

- Developed responsive, pixel-perfect UIs from Figma & Adobe XD using HTML, CSS, and JavaScript.
- Enhanced SEO with clean, semantic HTML and best practices.
- Implemented smooth animations (CSS, GSAP), smooth scrolling, sticky headers, and custom carousels.
- Optimized performance with lazy loading, minified assets, and compressed files.
