- Successfully completed an online training program in **Cyber Security** by **BSE-Brokers Forum** and **NISM, SEBI** on March 14, 2024, significantly enhancing expertise in essential security protocols.

PROJECT EXPERIENCE

Axis Direct DP Bills Recovery

- Developed DP bills recovery module as per regulatory requirement to notify/collect AMC charges from customer.
- Built a comprehensive Bulk Email and SMS notification system to alert clients about pending bills and significantly contributed to revenue growth.
- Integrated Razorpay Payment Gateway for recovery payment collection and developed real-time dashboard for customer notification and payment tracking.
- Leveraged PHP, MySQL, Razorpay Payment Gateway APIs, Netcore Email/SMS API, JavaScript, jQuery, HTML, CSS and CSS to deliver high-quality solutions.

Account Aggregator

- Streamlined the activation process for the derivative segment of Axis Direct demat accounts by developing and deploying WebSocket-based Finvu Account Aggregator APIs.
- Digitized the derivative activation workflow, transitioning from manual to automated approvals, which significantly decreased turnaround time (TAT) and improved operational efficiency.
- Led a team of 2 junior developers, providing mentorship and guidance to ensure successful project delivery.
- Leveraged PHP, MySQL, WebSocket, JavaScript, jQuery, HTML and CSS to create high-performance solutions that meet business needs.

MCXCCL fund allocation Automation

- Optimized MCXCCL ODIN fund allocation by seamlessly integrating MCXCCL and 63Moons ODIN APIs.
- Accelerated turnaround time from 15 minutes to just 3 minutes, significantly boosting operational efficiency in commodity fund allocation through full automation.
- Achieved an average daily allocation of INR 3 Crores, with a peak of INR 6 Crores on high-demand days, thanks to this automation.
- Worked as Individual Contributor for entire end to end project delivery.
- Leveraged PHP, MySQL, RESTful APIs Implementation, JavaScript, jQuery, HTML and CSS to achieve project objectives.

Axis Direct CX Survey for NPS like LitmusWorld Platform

- Developed and maintained an in-house CX Survey Module for Net Promoter Score and client feedback, similar to LitmusWorld.
- Reduced company expenses by developing a comprehensive in-house survey project complete with a monitoring dashboard.
- Enhanced data security by preventing user and CX survey data sharing with third parties through an in-house solution.
- Leveraged PHP, MySQL, SVG, JavaScript, jQuery, HTML and Media CSS to create a responsive design.

Axis Direct Track and Raise Ticket Portal

- Developed the Track and Raise Ticket Portal by leveraging Firstsource iLeverage APIs, significantly improving support for Axis Securities clients and dealer app administrators.
- Leveraged PHP, MySQL, RESTful APIs, JavaScript, jQuery, HTML and CSS to deliver a seamless user experience.

Small Business Loans Automation for ftcash Portal

- Engineered a comprehensive Loan Origination System (LOS) and Lead Management System (LMS), along with a dynamic Loan Stats monitoring dashboard.
- Integrated CIBIL APIs to automate the retrieval of CIBIL scores and reports, streamlining the loan approval workflow.
- Designed and developed RESTful APIs to support seamless functionality for both Android and iOS applications.
- Leveraged Laravel, Lumen, PHP, MySQL, HTML, CSS, JavaScript and jQuery to deliver robust solutions.
