

Ajay Auchar

Frontend Developer

Navi Mumbai | [+91 8291626294](tel:+918291626294) | ajayauchar02@gmail.com | [LinkedIn](#) |

Skills

JavaScript, TypeScript, React.js, Redux, Redux Toolkit, HTML, CSS, Tailwind, Material UI, Bootstrap, API Integration, Web Sockets, Responsiveness, GIT

Leadership, Project Management, Innovation and Research orientated

Experience

Interproductec

Frontend Developer

10 May 2022 - 30Apr 2025

Navi Mumbai, India

Prep Assistant

- Designed and developed scalable, **responsive web applications** using **React.js, Redux, JavaScript (ES6), HTML5, CSS3**, and **Material UI**, ensuring consistent performance across modern browsers and devices.
- Implemented **WebSocket integration** to support **real-time data communication**, enabling instant UI updates for kitchen equipment status and user interactions.
- Engineered **adaptive layouts** for desktop, iPad, and Android tablets using **Flexbox, CSS Grid**, and **Media Queries**, achieving a seamless cross-platform user experience.
- Identified and resolved performance bottlenecks, contributing to a **25–30% improvement in application load time**.
- Built and maintained a library of **modular, reusable React components**, improving **code maintainability** and reducing development time for new features.
- Orchestrated **state management** with Redux, enhancing UI reactivity and providing a **predictable data flow** across the application.
- Streamlined key UI workflows, contributing to **4–5 hours of prep time reduction daily**, directly impacting operational efficiency in commercial kitchens.

Tradeshow Dashboard

- Engineered a **real-time oven monitoring system** using **camera-based detection** to accurately track and validate product placement in trays, enhancing operational visibility.
- Developed robust **error-handling and validation logic** to ensure consistency in tray contents, eliminating product mix-ups and ensuring production accuracy.
- Built a dynamic **status tracking module** that visually represented product stages—**Baking, Heating, Done, Error**—enabling real-time decision-making for staff.
- Implemented **WebSocket-based communication** to deliver **instant product status updates**, supporting real-time synchronization between UI and backend systems.
- Collaborated with cross-functional teams to streamline user workflows, resulting in **improved operational efficiency** and reduced manual tracking.

TheContrast

Frontend Developer Internship

June 2021 - Dec 2021

Navi Mumbai, India

Mesbro - Ecommerce

- Developed and maintained **RESTful API integrations** for full **CRUD functionality** (GET, POST, PUT, DELETE), enabling seamless and reliable data operations across the platform.
- Implemented **conditional rendering and lazy loading** techniques to improve initial load times and enhance overall application performance.
- Integrated **pagination, filtering, and search functionality** within product listings to enhance data accessibility and user navigation.
- Leveraged async/await and **JavaScript Promises** to manage asynchronous data flow and ensure efficient UI rendering during API communication.
- Built **dynamic forms** with **custom event listeners** and **input validation logic**, improving user experience, reducing input errors, and ensuring data integrity.
- Optimized component lifecycle and API calls to minimize load times and **improve performance in high-traffic scenarios**.

Education

BSC in Computer Science

HSC - Science

2021 - 2024

2019 - 2021

Awards

- BTS (Behind the Scene) hero at InterProductec Virtual labs.
