

Application for the role of an UI UX Designer 2025

Respected Sir/Madam ,

My name is Sakshi Bhagwat, and I graduated from the GLS Institute of Design in Ahmedabad, Gujarat, with a **Bachelor's in Industrial Design with a Healthcare Product Design project.**

I recently came across your LinkedIn post regarding the **UI UX Designer Position** and would like to express my interest in the full time opportunity.

I have a multidisciplinary background in product and UI/UX design. I completed a two-month internship in 3D CAD and prototyping, working with start-ups on lifestyle product design. My six-month graduation project at GLS Institute of Design focused on design research and development. I also **worked on a six-month contract as a UI/UX Designer at Mail Minks, where I designed a user-centric website for the company. I have one year of professional experience in UI/UX design.**

In addition to this, I'm skilled at developing concepts, drawing, rendering, 3D CAD Modeling, Packaging design, UX Design, UX research and prototyping to produce the intended creative result.

Matching with what I've learned from the prior experience. I am also a very detail-oriented and self-disciplined individual. Starting a career with your organization and contributing to its success would be an honor for me. I believe that my prior experience, attention to detail, and passion for designing will be an asset to the company and its growth.

I would appreciate it if you go through my application and see if I might be fit for the position. I look forward to hearing from you.

Thank you for considering my application. Please accept the enclosed Resume and Portfolio. I look forward to discussing my work further. Again I appreciate your time consideration.

Sincerely,

Sakshi Bhagwat

Product Designer
