Skills

- JavaScript (ES6+)
- React.js
- Git
- jQuery
- React Hooks
- Functional programming
- State management
- Redux and use Context
- HTML5
- CSS
- Bootstrap 5

Education

Passout year: 2022

B.E: Information Technology

M.H. Saboo Siddik College of Engineering, Byculla, Mumbai - 08

CGPA: 8.57

Certifications

- [React - The Complete Guide \(incl Hooks, React Router, Redux\)](#)
- [ES6 JavaScript: The Complete Developer's Guide](#)
- [The Complete JavaScript Course 2023: From Zero to Expert!](#)

Ruzda Ansari

- **Software Developer Band 1**

Personal Summary

Proactive Software Engineer with a proven track record at MITR E-Learning Platform, specializing in React.js. Excelled in developing engaging e-learning applications with accessibility, significantly enhancing learning experiences. Hands-on experience in JavaScript (ES6+) with a focus on functional programming and state management. Focused on supporting team success and achieving positive results.

Experience

MITR E-Learning Platform - Software Developer Band 1

Andheri

12/2022 - Current

- Designed and developed dynamic, user-centric e-learning applications.
- I majorly contributed to projects like **Klett, Korn-Ferry, and Carolina**, using **React.js, JavaScript, HTML, CSS, and jQuery** to build **interactive and responsive educational simulations and templates, with accessibility features**.
- Worked on minor projects like Klett Maintenance, Sadlier Game, and Content Author Template, integrating AI-generated data, and collaborating on POC projects.
- Gained hands-on experience in **debugging** and closely **collaborating with teammates, QA, and graphic designers** to ensure seamless project execution.
- **Designed and implemented accessibility features**, leading to an **increase in user satisfaction and retention**.
- Improved and corrected existing software and system applications.
- Collaborated closely with team members to achieve project objectives and meet deadlines.
- Completed day-to-day duties accurately and efficiently.
- Analyzed code and corrected errors to optimize output.

Projects

Food Ordering App: Developed a React-based food ordering application with a dynamic cart system. Implemented features like adding/removing meals, updating quantities, order checkout, and real-time total price calculation. Utilized Context API for state management, modal-based UI for cart and checkout, and API integration for fetching meals and order submission.

Shopping Cart Application: Developed a dynamic e-commerce shopping cart using React and Context API. Implemented features like adding/removing items, updating quantities, calculating total price, and displaying a modal-based cart. Ensured seamless user interaction with efficient state management and component-based architecture.
