Frontend: NextJS, TypeScript, JavaScript, React.js, React Query, Redux, RTK, GraphQL, TailwindCss, Material-UI, Bootstrap, Shadcn

Backend: Node.js, Express.js, MongoDB, Redis, GraphQL, Firebase, Rest API, Microservices.

Tools: Docker, AWS, Razorpay, Commercetools, Contentful, Nodemailer, NVM, JIRA

Version Controlling: Git, GitHub, BitBucket, GitLab, AWS Code-Commit

Others: OOPs, Razor-Pay, Stripe, Agile Methodology, PWA, CI/CD, NPM, PNPM, YARN.

Projects

NeuMoney | *React, NodeJs, GraphQL, MongoDB, React Query, TypeScript, Redux, AWS, Bootstrap*

[🔗 Demo](#)

- Neumoney a retail banking system tailored for college students, focused on building a simplify credit card system.
- Grasped experience on developing the Admin Panel, Leave System, User bank Linking procedure, Credit card linking.
- Collaborated cross-functionally to ensure seamless integration of digital experiences.
- Utilized AWS services S3, EC2, CloudFront, CloudWatch, IAM, Lamba, Route53 and CodeCommit, and React query for mutations and RestAPI.

Genius.tv | *ReactTS, TypeScript, NodeJS, Contentful, CommerceTools, GraphQL, Bootstrap, BitBucket*

[🔗 Demo](#)

- Genius.tv is a wholesale marketplace business web application with multiple user roles, worked on improving performance, reliability, scalability, and security for our backend systems.
- Developed multi-role user management, product catalog, and master panel .
- Setup GraphQL and ApolloClient for data fetching and mutation queries.
- Linked headless CMS - Contentful and CommerceTools to fetch all the data dynamically to the master panel.

Brain Inventory | *NextJS, AWS S3, AWS Amplify, AWS Lambda, Route53*

[🔗 Demo](#)

- Brain Inventory's website boasts 50+ fully mobile-responsive, SEO-friendly pages. It ranks on Google's rankings, with a WordPress blog seamlessly integrated into a Next.js application.
- Created the EC2 instance to host the wordpress server of the blog and deployed the full stack application on AWS Amplify, Route53.

Numetric.Work | *MERN, AWS, Redux Toolkit, Microservices,*

[🔗 Demo](#)

- Contributed on service-oriented architecture, writing REST APIs, unit testing, and architectural design.
- Integrated Zapier for configuring the dataflow and utilized AWS with EC2, S3 bucket, RDS services.
- Integrated SQL and NoSQL databases and other technologies (e.g. Postgres, Redis, Elasticsearch, RabbitMQ)

Education

School of Computer Science and IT, DAVV, Indore, India

June. 2018 – July 2022

Bachelor of Computer Application (Hons.)

CGPA: 7.6
