EDUCATION

Xavier Institute Of Engineering

Information Technology - **CGPA - 6.31**

2018 –2022

Mumbai, India

KEY SKILLS

- React
- Ant Design
- TailWindCss
- React Router Dom
- Vite
- Axios
- React Konva
- Redux ToolKit
- Context API
- REST APIS
- Design Pattern
- HTML5, CSS3
- Charts
- React Query
- Azure Devops
- React Dev Tools
- JavaScript
- JavaScript ES6/ES7
- Azure Devops
- React Hooks
- Git
- Shadcn UI
- FlexBox
- NPM

PROJECTS

Mock Websites 🔗 | JavaScript, Html,Css,FlexBox

11 2022

- Smoothly Implemented **figma design to a modern design web page** .

Linkedin Post Clone 🔗 | Axios,React,Html,CSS,JavaScript,MockAPI,FlexBox,

02 2023

- Implemented Linkedin Post Clone **used Mock api to get users, content, image to display on the user interface.**
- Used flexBox for layout and pure CSS for styling

Todo App Using SupaBase 🔗 | Supabase,TailwindCSS,JavaScript,Html,CSS,React

03 2024

- Implemented Todo App **using supabase as a BAAS and tailwindCSS for UI**
- Used flexBox for layout and styling it with TailWindCSS
- Created Schema in Supabase Table editor and connected application with Keys

WORK EXPERIENCE

Jio Platforms Limited

07 2022 –Present

SDE

Mumbai, India

- Working as Frontend Developer in **Jio Access Control System (ACS) flagship product of jio platforms limited**
- Collaborate with stakeholders to gather **analyze, and translate business requirements into technical specifications**
- Developed a **AI-powered analytics platform** to enhance retail store operations using React, Redux Toolkit, React Query, and React Konva.
- **Key Contributions:**
- Store Onboarding Image Upload UI: Designed and implemented a comprehensive UI for onboarding stores, including image uploading functionality to submit base images for AI model training. This allowed users to easily upload and associate store images with specific AI jobs for training purposes.
- Built a feature for users to run AI jobs (e.g., POS monitoring, store open/close detection) by capturing images from store cameras.
- Custom Shape Drawing: Created custom algorithms for drawing shapes (polygons and rectangles) using React Konva, enabling users to mark specific regions on images for AI model training.
- Integrated backend AI model outputs to display meaningful insights from annotated images, enhancing operational efficiency for store management.
- Implemented zone performance tracking, dwell time analytics, and real-time footfall monitoring.
- Created interactive Nivo Chart visualizations and hover-based radar charts for enhanced data analysis.
- Streamlined navigation using React Router DOM for seamless routing between dashboards and analytics pages.
- **Key Achievements:**
- Delivered an AI-integrated annotation tool, boosting the accuracy of store activity monitoring through custom shape marking.

- Enhanced user engagement with a dynamic and intuitive interface for image annotation and AI model interaction.
- Increased frontend performance and scalability using Redux Toolkit and React Query for efficient state management and data fetching.
- **Technologies Used:**
- Frontend: React, Redux Toolkit, React Query, React Router DOM, Ant Design.
- Data Visualization: React Konva, Nivo Charts
- Others: Written Custom algorithms for shape drawing and hover interactions

TECHNICAL SKILLS

Languages: JavaScript,Python,Java,C

Developer Tools: VS Code,Azure Devops,Git,Github,Chrome DevTools,React DevTools

Technologies/Frameworks: React, RestAPIs, Ant Design, React Query, Material-UI, TailwindCSS, FireBase, Supabase, Nodejs, CSS, Html, Bootstrap

EXTRACURRICULAR

Hackathon - College

2019

Mumbai

- 5th runner Up ,there where 3 round of coding with included DSA questions

CERTIFICATIONS

- ReactJS - Linkedin learning
- Java
- Command Line in Linux - Coursera
- MongoDB Basics
- NodeJS with Express & MongoDB (basics)
