Summary

Frontend Engineer with 3 years of experience developing high-performance web applications using React.js, TypeScript, JavaScript, and modern frameworks. Proven expertise in building scalable user interfaces, optimizing application performance by 40%, and providing responsive designs to more than 10K users. Strong background in component libraries, state management, API integration, and Agile development methodologies.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SASS/SCSS, SQL

Frameworks/Libraries/Technologies: React, Redux Toolkit, Tailwind CSS, Responsive Design, RESTful APIs, GraphQL, DOM Manipulation, AJAX, Jest, Webpack, Yarn, Parcel, Vite, Data Structures

Developer Tools: Git, Bitbucket, Confluence, Figma, Canva, OpenAI, VS Code, Android Studio, Google Cloud Platform

Professional Experience

TechupLabs

August 2023 – Present

Frontend Engineer

Remote

- Developed responsive feedback dashboard using React.js, TypeScript, and Tailwind CSS for 100k+ users, achieving 35% improvement in load time through state management optimization and API request batching
- Built comprehensive UI component library with 25+ reusable components, reducing development time by 40% across 3 teams and ensuring design system consistency and code reusability
- Optimized Core Web Vitals (LCP, CLS, TBT) through lazy loading, image compression, and code splitting, resulting in 40% page speed improvement and 25% mobile traffic increase
- Implemented A/B testing experiments and AI-driven features, increasing user engagement by 20% and automating content workflows for enhanced user experience
- Established automated testing with Jest and React Testing Library, achieving 85% code coverage and reducing production bugs by 30%

The Parentinc

August 2022 – May 2023

Frontend Engineer

Mumbai, India

- Architected user-centric features using React.js, JavaScript, SCSS, and Razzle SSR for TheAsianParent and Mama's Choice platforms serving 500K+ monthly active users
- Led microfrontend architecture migration from monolithic structure, improving scalability and deployment flexibility while reducing build times by 50%
- Increased organic traffic by 35% and conversion rates by 12% through performance optimization, SEO implementation, and responsive design principles
- Collaborated with cross-functional teams in Agile environment, participating in sprint planning, daily standups, and code reviews for continuous delivery

Key Projects

Swiggy Clone Food Delivery App | React.js, Redux, Tailwind CSS, REST APIs

Live: Swiggy Clone

- Developed full-stack food delivery application with dynamic restaurant listings, cart management, and real-time Swiggy API integration
- Implemented responsive design with Tailwind CSS and optimized performance using Parcel bundler and lazy loading

Notes Management Application | TypeScript, React.js, Local Storage

Live: notes-taking-web-app

- Built TypeScript-based notes application with CRUD operations and local storage persistence for offline functionality
- Designed responsive UI with custom CSS and implemented search functionality for enhanced user experience

Education & Certifications

University of Mumbai

Aug 2018 – June 2022

Bachelor of Engineering, Computer Engineering

CGPA: 8.32/10.0

Mumbai University

Sep 2016 – May 2018

12th Grade - Science

69%

Certifications: React.js Development, JavaScript ES6+, Responsive Web Design, Frontend Development
