Mumbai, MH
2018 - 2022

PATUCK TECHNICAL JUNIOR COLLEGE

Higher Secondary (HSC) | Percentage: 84.46

Mumbai, MH
2017 - 2018

WORK EXPERIENCE

FYNTUNE SOLUTION PRIVATE LIMITED (InsurTech Startup)

Software Engineer

Navi Mumbai, MH
May 2023 – Present

- Integrated insurer APIs like Quote, Riders, Features, Discount, Proposal, KYC, and Payment Gateway by following object-oriented principles to build scalable and maintainable services
- Developed and enhanced the admin panel for the health portal, creating modules to manage master data and configure the customer journey
- Revamped and independently developed the communication module for the retail portal using the Strategy Pattern, improving API response times by 35%
- Collaborated with a colleague to build a JSON-based Integration Parser and Configurator, publishing a Composer package to automate dynamic payload creation. Successfully implemented it for one insurer's complete flow
- Played a major role in building the Pet Insurance portal from scratch, delivering an end-to-end solution from database design to API development within 2 months
- Contributed to the development of the Quote Management System (QMS), allowing quick quote generation based on insurer-provided plan details sheets and premium bifurcations without relying on slow external APIs, improving agent pitching time by 65%
- Optimized QMS codebase by refactoring to a modular structure, removing redundant queries, implementing caching, and improving API response time by 45%
- Developed a WhatsApp chatbot using Twilio to generate insurance quotes based on user inputs, integrating it seamlessly with the backend. Over 100+ agents used this feature effectively for daily operations.
- Currently building India's first insurance-specific CRM platform, covering complete sales and service lifecycles for brokers. Developed features like Lead Scoring using Laravel Pipelines, Revenue Generation Models, Dashboards, and 3rd Party B2B/B2C Integrations by applying OOP, SOLID principles, and design patterns. Enabled real-time data sync between external systems and the CRM.

IKSULA SERVICES PRIVATE LIMITED (E-commerce Solutions)

Trainee Software Developer

Andheri, Mumbai, MH
Jul 2022 – Apr 2023

- Received initial training in PHP development after joining the organization, gained hands-on experience in backend development, and a strong understanding of end-to-end version control systems
- Built custom forms, new features, REST APIs, and handled theme customizations for an e-commerce client, supporting daily changes and enhancements based on their requirements

SKILLS

Languages: PHP, SQL, C, HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL, MongoDB, Redis

Frameworks: Laravel, Drupal

Testing: PestPHP

Developer Tools: Git, Postman, WinSCP, PuTTY, HeidiSQL

PROJECT

ALUMNI DATABASE MANAGEMENT SYSTEM

- Built a web application with college colleagues to manage college alumni records using HTML5, Tailwind CSS, JavaScript (AJAX), PHP, and MySQL, enabling alumni to post job openings, mentor students, and network easily
- Developed an admin dashboard for administrators to manage users, monitor activities, and approve job listings, helping improve interaction between administrators, alumni, teachers, and students
