Skills: React.js, Redux, React Hooks, Context API, Mongo DB , Next. Js , JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Node Js , JWT

WORK EXPERIENCE

Just Job HR

Mumbai

Frontend Developer

Jul 2023 - Present

- Automated a job notification system using **Meta WhatsApp Business API** to deliver real-time job details to candidates, improving engagement and reducing manual communication overhead.
- Built a **responsive React.js frontend interface** to monitor notification performance and user interactions, resulting in a 25% increase in message delivery success rates and improved user satisfaction.
- Developed and integrated a robust SMS and WhatsApp API system, enabling **real-time delivery of job details** to over 10,000 candidates daily, significantly enhancing communication efficiency.
- Collaborated with backend developers to consume and display REST APIs, reducing data fetching errors by 30%.
- Used Redux and React Hooks for robust state management across real-time job application modules.
- Applied lazy loading and code-splitting to cut load times by 73%, enhancing user experience and performance.
- Designed and implemented reusable component libraries, improving team development speed by 25%.

PROJECT EXPERIENCE

NFT LANDING PROJECT

Mumbai

<https://nft-page-react.netlify.app>

- Implemented **Styled Components** to modularize CSS architecture, reducing styling-related bugs by 30% and enhancing visual consistency across all device types.
- Designed and animated over 5 NFT collection images within the platform, increasing user engagement by 35%, while maintaining seamless navigation using React Router for an uninterrupted browsing experience.
- Built a scalable component library of 50+ reusable React elements, standardizing UI patterns, improving code maintainability, and accelerating feature release timelines by 25%.
