Experience

Software Developer, TATA CONSULTANCY SERVICES July-2023 - CURRENT

- Led a frontend team in the development, deployment, and maintenance of internal web applications.
- Developed automated solutions using DJANGO and Node.js, creating web interfaces with HTML, CSS, REACT, and Web services.
- Utilized AI and Generative AI technologies to enhance project outcomes.
- Facilitated Agile ceremonies using Jira, significantly enhancing team productivity and project tracking.
- Collaborated with UX/UI designers to ensure cohesive and user-friendly application interfaces.

Projects

YouTube Clone LINK

- Created a YouTube clone using React, Node.js/Express, and MongoDB, replicating core functionalities.
- Enabled user-friendly video browsing with categorized recommendations and search functionality.
- Implemented engagement features such as comments and likes.
- Ensured platform responsiveness across various devices for optimal viewing experience.

Online E-Commerce Platform LINK

- Developed an e-commerce platform using React, Node.js/Express, and MongoDB for streamlined functionality.
- Implemented user authentication and authorization for secure account access.
- Showcased product catalog with detailed descriptions and images.
- Integrated shopping cart functionality for adding, removing, and modifying items.
- Developed order management system for tracking order status and history.
- Provided user profile management with options to update personal information and view order history.

Stack Overflow Clone LINK

- Built a Stack Overflow clone using React, Node.js, Express, and MongoDB.
- Enabled users to post questions on various topics and categories.
- Implemented functionality for users to submit answers to posted questions.
- Included up-voting and down-voting features for both questions and answers to rank their relevance.
- Provided comment sections for users to leave comments on questions and answers for further clarification or discussion.
