PROJECTS

CRAFTIQ – Design, Play, Grow

Gamified Learning App for Designers (Major Project)

- Designed a peer-driven, challenge-based learning platform aimed at improving daily design skills. Created intuitive UI flows, resource architecture, and feature sets including mentorship modules and peer review systems. Built high-fidelity prototypes using Figma.

Nestify – Smart Home App

- Designed an accessible smart home interface to simplify daily automations and device control. Focused on usability, consistency, and efficient task flows for users of varied abilities.

Unroll – Subscription Management

- Crafted a clean, insight-driven app for tracking and managing online subscriptions. Included visual dashboards, cost insights, reminder flows, and reward-based engagement strategies.

Pantaloons – A UX Case Study

- Proposed a "Try & Buy" e-commerce feature to improve trust in online fashion shopping. Designed user flows and prototypes to support easier returns, real-user reviews, and transparency.
