OBJECTIVE

*Experienced Software Engineer with over **4+ years** of expertise in **frontend and hybrid app development**, specializing in **HTML, CSS, JavaScript, React.js, React Native, Web3 and RainbowKit**. **Adept at managing technology stacks, teams, and delivering robust web and mobile applications**. Strong foundation in **UI/UX design** using tools such as **Figma and Zeplin**.*

SKILLS

Languages:	JavaScript, TypeScript, SQL, HTML/HTML5, CSS/CSS3
Frameworks & Libraries:	React.js, Redux, React Router, React Native, React Navigation, Redux Toolkit, Redux-Saga, Redux Toolkit Query, Node.js, Nest.js, Express.js, GraphQL, MongoDB, Web3, RainbowKit
Tools:	Git, JIRA, VS Code, Figma
Other:	RESTful APIs, Firebase, AWS

EXPERIENCE

SENIOR SOFTWARE ENGINEER

Techstalwarts Software Development LLP

January 2021 - Present

Role: Senior Software Developer and Team Leader

- Managed and led development teams for **high-performing web and mobile applications** using the **MERN stack** (MongoDB, Express.js, React, Node.js).
- Ensured code **quality, maintainability, and adherence** to **best practices** through modern front-end and back-end technologies.
- Collaborated with product managers and designers to develop **user-friendly interfaces** and **feature-rich applications**.
- Familiar with Agile and Scrum methodologies for streamlined project execution.

PROJECTS

Client: MP Board - *Examination Logistics and Tracking System*

- Developed the MERN stack application from scratch.
- Led the frontend team, managing client requirements and conducting PR reviews.
- Deployed on AWS EC2 using PM2 and integrated S3 for file uploads.

Client: Norminc of Magenta (*Vehicle Tracking Portal*)

- Developed the frontend using React.js and integrated Redux Toolkit.
- Handled API integrations with Axios and Express.js backend.

Client: GetKredit (*Real Estate CRM System*)

- Built the CRM system from scratch using the MERN stack.
- Led frontend development and integrated Redux-Saga for handling complex asynchronous data flows.

Client: Aditya Birla Channel Partner Portal & App

- Developed React.js-based frontend for the portal and React Native for the mobile app.
- Implemented Redux Toolkit and RTK Query for efficient state management and API integration.

Client: V5 Global (*Vendor Portal*)

- Created a vendor portal from scratch using React.js.
- Upgraded the architecture from monolithic to microservices, optimized API integrations, and handled multi-role access control.

Client: Lendenclub (*P2P Lending Platform*)

- Maintained and optimized existing portals using React.js and React Native.
- Implemented advanced caching and performance optimization techniques.

Client: Jarvis Invest (*AI-Based Advisory Platform*)

- Revamped the web application using React.js and collaborated on backend development using Node.js.
- Implemented security measures, including CORS and data sanitization.

Client: Sarwa (*Ecommerce Application*)

- Developed the user panel using React and React Native, improving app performance with lazy loading and optimized API calls.

Client: Loft (*Dubai-based Salon Application*)

- Upgraded the entire React Native application, improving performance and security with features like caching and secure storage.

Client: Playmaker (*Slot Booking Application*)

- Developed frontend using React Native and Redux Toolkit.

Client: Endl (*Dubai-based Crypto to fiat currency converter*)

- Led the frontend development team and contributed to the React.js-based portal development.
- Spearheaded the base setup for the project, ensuring a scalable and maintainable code structure.
- Collaborated with cross-functional teams to deliver a high-quality user interface for crypto-to-fiat currency conversion.

EDUCATION

Master of Computer Applications (MCA)

Manipal University, Jaipur | 2024 - Present

Bachelor of Science in Information Technology (B.Sc. IT)

Prahladrai Dalmia Lions College, Mumbai | 2017 - 2020

INTERESTS

- Painting
- Reading
- Gaming
- Guitar

LANGUAGES

- English
- Gujarati
- Hindi
- Marathi
