<https://www.yapsody.com>

Yapsody is complete event management system. We can setup own event, Customize event details, pricing, taxes, discount, free tickets, facebook, twitter etc. We can book tickets through box office as well as customer interface. Also through account setting section we can manage customer Interface. We can refund tickets through box office also. We have also add Google chart, PDF, XSL and CSV for report.

<http://www.mymobilesyncpro.com/panel/index.php>

Mobilesync pro software is sync software. User can register web panel and device both places. After login user add device and sync data from mobile to server and server to mobile. User data on device and server will always same. If user deletes contacts from device then same contact will delete from server. User can store as a backup (contact, task, event, video, text file etc).This software is feasible on Android, Iphone, Blackberry, Windows, Pc sync and Mac sync. Tools used CORE PHP, Ajax, XML and MySQL for database
