PROJECTS

[Flix-Mingle](#) built with- ReactJs, Firebase, TailwindCSS

Developed a React app with TailwindCSS and Firebase backend.

Implemented user authentication using Firebase. Managed user redirection based on authentication

Utilized Redux for state management

Integrated the TMDB API for movie data. Create a visually appealing UI with autoplay YouTube trailer.

[“Food Craving”](#) Built React-based e-commerce platform for online food ordering, featuring configurable UI. Integrated real-time data from Swiggy API and implemented search functionality for catalog browsing. Employed TailwindCSS for full responsiveness and mobile compatibility. Implemented recommendation system based on user search and interests

[“Trade Coin”](#) A platform for real-time viewing and comparison of multiple digital currencies. The platform has past 5 years data for in-depth analysis and decision making. Also there's an option for multiple time frames selection along with user friendly Light & Dark Mode
