FULLSTACK DEVELOPER

PROFESSIONAL EXPERIENCE

Junior Developer - StoreApps Technologies LLP

May 2021 - Nov 2023

- Developed and maintained a microservices based architecture with Nodejs, Typescript, MySQL, MongoDB and RabbitMQ to support products that served 9500+ premium users on a daily basis.
 - Designed API's to manage email authentication, spam checking, DMARC and DKIM validation, email validation and sending processes to facilitate email marketing for 120K+ websites.
 - Collaborated with team of 4+ members to build new features into wordpress email marketing, popup & lead magnet plugin products.
 - Conceptualized and led the development of product analysis dashboard with Nodejs, MySQL and templating engines, to analyze product growth, churn rate and frequently used features.
 - Collaborated with team of 6+ members to develop features for a ReactJS and GraphQL based SaaS product with integrations of payment API's like Stripe, Paddle & Paypal.
 - Actively participated in software deployment processes, working with Gitlab CI CD, Nginx configurations, load balancing, Cassandra DB administration & SFTP deployments
-

SKILLS

- **Programming Languages** : Javascript, Typescript, PHP, Core Java, Golang, C, C++.
 - **Frameworks & Libraries** : Nodejs, ReactJS, NextJS, MithrilJS, Laravel, Wordpress plugin development.
 - **Databases** : MySQL, MongoDB, PostgreSQL, Clickhouse, Redis.
 - **Server** : Vercel, Linux (Ubuntu), AWS Elastic Beanstalk, AWS EC2, S3, Serverless AWS Lambda, Cloudwatch, Nginx, DNS configuration, SSH, SFTP, Firewall, Process Managers(PM2).
 - **Other** : Git, Github, AMQP RabbitMQ, Ci/CD Github workflows, Payment gateway, ESP's, Postman.
-

EDUCATION

- **Bachelor of Science in Information Technology**, *St. Gonsalo Garcia College, Vasai West.*
2016 -2019 - 8.22 CGPA
 - **Higher Secondary Education, Computer Science**, *Sheth Vidya Mandir College, Vasai East*
2014 -2016 - 73 %

PROJECTS

Speakspace

Speakspace is a Social media application built in NextJS with TailwindCSS / ShadCN components and deployed on Vercel. The project entails implementing concepts like user authentication, user and community creation, posting ideas and interacting with them. The application interacts with a MongoDB cluster via mongoose to persist and retrieve data. The authentication is handled with ClerkJS API and the application provides webhooks to listen for interaction events.

Patrondigi

Patrondigi is a digital course web application built in ReactJS with TailwindCSS and deployed on Hostinger VPS. The project intends to provide playlists of video courses to users. The applications handles user signup/login, sending of emails for user verification, displaying video courses and facilitating payments via payment forms for bonus video content. Authentication and plan validation is handled via Nodejs backend built for the app which interacts with a self hosted MongoDB cluster and hostinger based smtp for sending emails. Nginx is used to configure the routing for entire frontend/backend system architecture.
