B.J.H.M.V. Kajgaon

KEY ACHIEVEMENTS

🏆 Best Performer of the Year

Achieved the best performer of the year in 2024.

SKILLS

React JS	Redux	Thunk	Saga	Node JS	Express JS	Javascript	HTML5	CSS3	Server Side Rendering		
Client Side Rendering		React Hydrate		Caching	CI/CD	Debugging	Bootstrap	Git	Github	Java	JWT
Lodash	Product Management		Restful apis		SEO	SQL/Mysql	Jest	Front-End	User Interface Design		
WebPack	Performance Testing		unit testing		vscode	WebSockets	Algorithms	Context Apis		Flux	

PROJECTS

Smart Task Manager

📅 01/2023 - 05/2023

A web application for managing personal tasks with various features for improved productivity.

- Developed a task management system allowing users to create, update, delete, and organize tasks.
- Implemented real-time updates using WebSockets, drag-and-drop functionality, and dark/light mode toggle.
- Optimized performance using React.memo, useCallback, and useMemo, ensuring smooth rendering.
- Implemented authentication via Firebase/Auth0 and secured API communication with JWT.

PROJECTS

Global News Hub

📅 06/2023 - 09/2023

A news platform providing users access to current events from around the world.

- Developed a responsive news website providing users with the latest global news in real-time.
- Integrated a search feature with specific date-time filtering for news articles.
- Optimized performance using React.memo, useCallback, and useMemo for efficient rendering.
- Implemented lazy loading, dynamic imports, and API caching for enhanced speed.

Smart E-commerce Dashboard

📅 10/2023 - 12/2023

An e-commerce platform dashboard facilitating comprehensive management of online stores.

- Improved sales performance by {25%} by developing a dynamic e-commerce dashboard for analytics and product tracking.
- Allowed users to filter products and visualize data through interactive charts.
- Enhanced SEO and website performance with various optimizations.

STRENGTHS

Technical expertise Adept at using ReactJS and Node.js for scalable projects.	Team collaboration Effective collaboration through Git and DevTools integration.
Performance optimization Innovative in optimizing websites for speed and efficiency.	Adaptability Strong ability to adapt to evolving industry trends.
