EXPERIENCE

❖ Software Developer | Senwell Solutions , Pune

(Nov '23 - Present)

- Seamless integration of third-party APIs and services into applications, enhancing functionality.
- Implemented unit and integration tests using Jest, React Testing Library to maintain code quality.
- Demonstrated ability to tailor solutions to meet specific organizational needs efficiently.
- Implemented state management solutions using Redux, Context API for efficient data handling.
- Built reusable React components and custom hooks to streamline development.

❖ Frontend Developer | HTech Soft Software ,Kanpur

(Jan '22 – Oct '23)

- Implemented code splitting, lazy loading, and various performance enhancements to optimize application performance and reduce load times.
- Used React Router for dynamic navigation and optimized routing for smooth user experience.
- Followed Agile methodologies, participating in sprint planning, code reviews, and daily stand-ups.
- Committed to efficiency and scalability, ensuring that enhancements contribute the application's performance and usability.

PROJECTS

❖ ConnectCx

- **Centralized Access and Role Management:** Contributed to the portal project, centralizing access to internal applications with distinct roles (Editor and Super Editor). Enabled Super Editors to manage user roles and permissions, and oversee content creation and publication.
- **Article Management and Media Upload:** Developed the article management section, allowing users to create, preview, and publish articles. Implemented a media upload feature with size limitations.
- Developed a chat application with real-time messaging functionality using a Kafka-based architecture, implementing Kafka producers and consumers to ensure efficient message transmission and processing within the chat module.

❖ Retrex

- **Performance Optimization and Scalability:** Implemented code splitting, lazy loading, and various performance enhancements to optimize application performance and reduce load times, ensuring efficiency and scalability.
- **Impactful and User-Focused Results:** Developed a dynamic user property details popup that opens simultaneously when clicking checkboxes, allowing multi-selection while maintaining accessibility. Additionally, implemented a modal that opens upon clicking the user profile, ensuring background functionality is disabled for a focused user experience.
- Integrated Google Maps to display property details with exact locations, differentiating between published and unpublished properties

EDUCATION

- B.Sc. (Information Technology) | D.A.V. College , Kanpur (Jul '18 – Jun'21)
- XII (U.P.) | N.L.K. Inter College 84.6%| 2016

SKILLS

Programming Languages: JavaScript, HTML5, CSS 3

Frameworks: React Js, Next Js , Redux , Redux tool Kit, Node Js, ExpressJs.

Other Skills : Data Structures, Algorithms, JSON, Restful API, Restful Web Services,Kafka
React- Query, Material UI, Tailwind, GIT, Github,Jest , Bit bucket.
