Career Objective

A passionate React Developer with 2 years of experience in building scalable, high-performance web applications. Seeking to contribute technical expertise and creativity in developing innovative solutions as part of a dynamic team. Focused on writing clean, reusable code and delivering seamless user experiences.

Professional Summary

- Proficient in JavaScript, React.js, Redux, and other modern web technologies.
 - Hands-on experience with RESTful APIs, component-based architecture, and front-end frameworks.
 - Adept at debugging, optimizing, and enhancing code for better application performance.
 - Strong understanding of responsive design and cross-browser compatibility.
 - Skilled in version control using Git and familiarity with Agile methodologies.
 - Developed and deployed multiple production-grade React applications with a focus on scalability.
 - Experience working in collaborative, fast-paced development environments.
 - Knowledgeable in integrating third-party libraries, including material design and charting tools.
 - Regularly participate in code reviews, ensuring quality, maintainability, and scalability.
-

Employment Summary

React Developer

Company Name :- Infosys

Duration: jan-2023 – Present

- Developed and maintained complex user interfaces for web applications using React.js and Redux.
- Collaborated with cross-functional teams to define and implement innovative software solutions.
- Integrated third-party services and RESTful APIs into the frontend application.

- Implemented state management solutions using Redux, ensuring smooth data flow across the application.
 - Optimized the web applications for maximum speed and scalability.
-

Technical Skills

- **Languages:** JavaScript (ES6+), HTML5, CSS3
 - **Libraries/Frameworks:** React.js, Redux, React Router, Axios
 - **Tools:** Git, GitDesktop
 - **Databases:** MongoDB
 - **Other Skills:** REST APIs, AJAX, Responsive Design, Tailwind CSS
-

Academics

Bachelor of Computer Application (BCA)

Shivaji University, 2019

Master of Computer Application (MCA)

Shivaji University, 2022

Project Details

Project 1: E-Commerce Web Application

- **Technologies:** React.js, Redux, Node.js, MongoDB, Express, HTML5, CSS3
 - **Project Description:**
Developed a scalable e-commerce platform that allows users to browse and purchase products, manage their shopping cart, and complete transactions securely. Integrated payment gateways and order management functionality.
 - **Role & Responsibilities:**
 - Designed and implemented UI components using React and Redux.
 - Integrated product APIs and user authentication.
 - Ensured responsiveness across different screen sizes and devices.
 - Collaborated with backend developers to integrate the front end with RESTful APIs.
-

Project 2: Social Media Dashboard

- **Technologies:** React.js, Redux, Chart.js, Tailwind

- **Project Description:**

Developed a social media analytics dashboard that visualizes user engagement data, trends, and performance metrics. This dashboard allows users to track key statistics across multiple platforms in real-time.

- **Role & Responsibilities:**

- Designed and implemented the frontend architecture using React.js and Redux.
- Integrated dynamic data visualizations with Chart.js.
- Developed reusable components to improve code maintainability.
- Worked on optimizing the application's performance using React's PureComponent and lazy loading techniques.
