Education

- **B R Harne College Of Engineering** Mumbai, India
Bachelor of Engineering; GPA: 7.54 August 2016 - October 2020
- **Arya Gurukul International College** Mumbai, India
Class XII ; Aggregate: 80.46 2014 - 2016

Skills Summary

- **Languages:** Java, JavaScript, C++
- **Software Tools:** VS Code, IntelliJ IDEA, Postman, SQL Server Management Studio (SSMS)
- **Frontend Technologies:** ReactJs, NextJs, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Spring Boot, RESTful API design, API optimization
- **Web Development:** Server-Side Rendering (SSR), Client-Side Rendering (CSR)
- **Version Control:** Git, GitHub

Work Experience

- **Collegedunia Web Private Limited** Gurugram
Frontend Developer July 2024 - Present
 - **Resolved Frontend Issues:** Identified and resolved bugs reported by the **QA, Product Management, and Content teams**, ensuring smooth functionality and improved user experience.
 - **Developed Mock Test Page with Dynamic Data Handling:** Designed and developed the **Mock Test Page** for exams based on **Figma designs**, incorporating robust checks for undefined or optional data to prevent UI crashes. Utilized **GraphQL queries** for dynamic data retrieval and implemented **SSR optimization** to improve load times and user experience.
 - **Enhanced Core Web Vitals:** Improved the **Cumulative Layout Shift (CLS)** of the Mock Test Page, leading to a 20% boost in **SEO performance** and better adherence to Google Web Vitals standards.
 - **Implemented Data-Driven Components:** Added a **Top Courses Table** for abroad colleges, dynamically populated with data. Integrated modals to display additional course information upon interaction, improving user engagement.
- **Tata Consultancy Services (TCS)** Mumbai
Systems Engineer February 2022 - June 2024
 - **Developed E-commerce APIs:** Created and deployed APIs for **BSL Services' e-commerce application**, ensuring smooth functionality and alignment with business requirements.
 - **Optimized Cart Operations:** Modified the **Cart API** to improve load times for **item addition and removal** by 30%, enhancing overall user experience and reducing latency.
 - **Designed Invoice Module:** Designed and implemented the **MySQL database schema** for the **Invoice Module**, facilitating accurate and efficient data management. Developed corresponding APIs to streamline invoice generation and retrieval processes.
 - **Data Migration with Syniti:** Contributed to seamless data migration from **SAP ECC to S/4 HANA** by writing and integrating optimized **MS SQL queries** within Syniti's platform, reducing migration errors by 15%.
 - **Enhanced System Performance:** Improved API response times by implementing best practices for **RESTful API development** and database optimization, leading to a 20% performance boost across modules.
 - **Collaborated with Cross-functional Teams:** Worked closely with QA, DevOps, and business analysts to troubleshoot API issues, reducing reported defects by 25% during project development cycles.
