Experiences

Bit Shala, Mumbai - Software Developer Engineer, Feb 2024 - Dec 2024

- Led the development of a React JS project, emphasizing component reusability and maintainability to ensure a scalable and efficient codebase.
- Implemented clean code practices and designed a scalable architecture to enhance long-term project sustainability and performance.
- Integrated third-party APIs to expand application features, resulting in a 15% reduction in processing time and improved user experience.
- Worked closely with backend developers to integrate RESTful APIs, ensuring seamless data flow and enhancing application reliability.

Wohlig Transformation , Mumbai - Software Developer Engineer, Dec 2022 - Jan 2024

- Spearheaded web application development initiatives utilizing React JS, Vue JS, and Angular JS; coordinated completion of five concurrent projects on time while ensuring alignment with specific business objectives to enhance operational efficiency.
- Designed and maintained responsive interfaces using Nuxt JS, Vuetify, PrimeVue, and Bootstrap, resulting in a 30% improvement in UI/UX and user satisfaction.
- Engineered innovative features and resolved complex technical issues, enhancing user experience and functionality by 25%.
- Engaged in collaborative efforts among multi-disciplinary teams including design and engineering units; findings identified significant issues leading to a reduction in product crashes by addressing the top three root causes.
