SOFTWARE DEVELOPMENT ENGINEER

SKILLS

Angular, HTML & CSS, JavaScript, Angular Material, Bootstrap, TypeScript, C++, Git, NodeJs, Cypress, Sequelize, MySQL

WORK EXPERIENCE

Studioity Pvt. Ltd.

Feb 2024 - Present

Studioity Application

- Developed a screenplay converter module for PDF, TXT, and FDX formats using Quill and Angular Material. <https://studioity.com/screenplay-converter>
- Created a module for generating call sheet and shooting script reports in landscape and portrait formats using Angular, EJS, and Node.js.
- Engineered a call sheet module with toggleable department sections using Angular, EJS, Material, and Node.js, allowing dynamic section visibility management.
- Developed a sidebar hamburger menu component for displaying all project modules using Angular Material, and implemented a robust coupon code functionality within the package system.
- Built an Angular contact management module to simplify contact addition, import, and export, enhancing usability and productivity.
- Developed a robust module for managing department categories, including creation, deletion, and merging functionalities, using Syncfusion components and Angular.
- Developed an Angular onboarding component to guide first-time users through creating projects, uploading scripts, and acquiring free trial packages, utilizing Angular Material for a seamless and interactive user experience.
- Created a Global-Setting component to display user profiles and manage package upgrades.
- Implemented a Budget Module in Angular using Syncfusion TreeGrid after conducting in-depth research on TreeGrid functionalities for effective data management.
- Implemented roles and permissions management across multiple modules, ensuring dynamic access control and efficient user role handling.
- Implemented AI-driven text suggestion and editing features in Quill for screenplays, enabling customization based on format, tone, language, length, and user-defined inputs.
- Implemented toolbar functions like undo/redo, auto-save, cursor position restoration with scrollTo, and ops data fetching/updating in the Quill editor for screenplay management.
- Implemented the Team Page UI in Angular with role-based access control, enabling owners, admins, and members to manage and edit permissions
- Implemented a beat-board feature in the screenplay Quill editor, supporting 3 and 5 act structures, using Angular Material

Codefire Technology Pvt. Ltd.

May 2023 - Jan 2024

Codefire PMS

- Designed and implemented an Angular-based Employee Information System for streamlined management of personnel data.
- Successfully integrated ChatGPT using an Angular frontend and Node.js backend, ensuring secure user data storage and enhancing interactive conversational experiences.
- Implemented seamless work-from-home functionality with Angular for frontend development, ensuring a cohesive and user-friendly experience.
- Developed attendance-list functionality with integrated search filters for employee code and date, using Angular for frontend.

CR360 Feedback System

- Designed and implemented OTP-login functionality using Angular for frontend and Node.js API for backend, enabling password creation, OTP verification, and secure user response storage.
- Developed key features in Angular, including authentication, role-based access, and localStorage data handling, with routing, services, and a Node.js, Sequelize, MySQL backend.

- Created robust APIs for a social web application, enhancing functionality, performance, and user experience.

VVnT SeQuor

Dec 2022 - Mar 2023

Employee Performance Management

- Developed responsive Login, Signup, and Dashboard pages in Angular using Bootstrap and template-driven forms
- Developed automated tests with Cypress & Selenium and managed manual testing in Jira for efficient bug tracking

EDUCATION

Master Of Technology (M.Tech) | IIT Dhanbad

Sep 2020 - June 2022

- 8.03 CGPA
- Member of the Technical club, where I have coordinated in multiple events.
- Researched and authored a thesis on Optical Frequency Comb using AM, FM, and MZM modulation.

Bachelor Of Technology (B.Tech) | University College Of Engineering, (RTU)

Aug 2013 - July 2017

- 63.19%
- Major in Electronics and Communication Engineering
- Interned at Bharat Sanchar Nigam Ltd. gaining valuable experience in Signal and Communication

PERSONAL PROJECTS

Resume Generator

Feb 2025 - Present

- Developed a Resume Generator using Angular, Angular material, Bootstrap, Fontawesome and html2pdf.js, enabling users to create, customize, and download professional resumes in PDF format with real-time preview and template selection.
<https://easy-resume-creator.netlify.app/>

Inventory Management System

Feb 2025 - Feb 2025

- Developed an inventory management system using Angular, Angular Material, and JSON Server, featuring order processing, product and brand management, with real-time notifications via Toastr.
<https://inventory-management-link.netlify.app/>

Tic Tac Toe Game

Oct 2024 - Oct 2024

- Developed a Tic Tac Toe responsive game using Angular, implementing dynamic game logic, real-time updates, and a smooth user experience.
<https://euphonious-fairy-8828de.netlify.app/>

Employee Leave Management

Jan 2025 - Jan 2025

- Developed a comprehensive Employee Leave Management App using Angular. The application allows employees to manage their leave requests and provides administrators with tools to approve or reject requests.
<https://roaring-elf-71ea91.netlify.app>

CERTIFICATIONS AND ACHIEVEMENTS

- Achieved 98th percentile in GATE (Electronics & Communication) 2020.
- Certificate of Appreciation from Studiovity for expertise in accomplishing all website frontend tasks with excellence.
- Completion of 1 Year at Studiovity – Studiovity
- Angular Certified (HackerRank) – Proficient in essential web development with Angular.
- Certificate of completion Angular Course
- Udemy certification in Sequelize-ORM using node js
- Ranked as the second-highest bug identifier at VVnT SeQuor.
- HackerRank SQL Certification
