Language & Technology

Technology

ReactJs | ExpressJs | MongoDB | NodeJs | Tailwind | Postman | P5Js | Bootstrap

Language

C++ | HTML | JavaScript | CSS

Other Skills

Figma | VS Code | Linux (Ubuntu) | ChatGPT (Prompt Engineering)

Experience & Projects

Jio Platforms Limited - Assistant Manager (1 yr 3 mos)

Initiated and Developed User Metrics Visualizer (UMV) for Employee Performance Tracking

- Conceptualized and spearheaded the development of an internal project aimed at managing and tracking the performance of over 150 team members.
- Designed and implemented a data-driven user interface to visualize bug severity and scores through dynamic charts (line graphs, pie charts), aiding in performance assessment and decision-making.
- Utilized React.js for front-end development, Express.js for backend API integration, and MongoDB for efficient data storage and retrieval.
- Delivered a tool that significantly improved team productivity by providing clear, actionable insights based on user metrics and bug reports.

This version emphasizes that you were the one who initiated and led the project while maintaining a professional tone.[temporary link](#)

Initiated and Developed Namu AI MultiResponse Generator

- Developed a React.js application to automate the QA process by processing multiple user prompts from an Excel sheet, eliminating manual copy-pasting and response sorting.
- Streamlined workflows, reducing repetitive tasks and increasing efficiency for the QA team.[Multiresponse Generator](#)

Quality Assurance and Optimization for Jio DAM and Namu AI

- Actively contributed to enhancing Jio DAM, an asset management and storage software, by identifying and addressing key performance and functionality issues to drive product improvements.
- Played a significant role in refining Namu AI by validating prompt responses and optimizing features, ensuring the system's efficiency and user experience.
- Leveraged Postman for API automation, improving backend reliability and streamlining processes for better system performance.[Jio DAM](#)

Self Associated Projects

InstaGit (founder)

- Designing and developing a unique platform combining social media features and project-sharing tools similar to GitHub, enabling users to share their projects and engage with others through sharing, saving, and commenting.
- Created user profiles where projects are shared as posts, containing detailed information such as videos, descriptions, screenshots, and technologies used.
- Defined the framework and model for the platform, designed the prototype using Figma, and transitioned to development using Next.js, TailwindCSS, and Express.js.
