EXPERIENCE

- Vineo Technologies Pvt. Ltd.** **April 2023 - Present**
Role Software Engineer
 - Developed scalable and responsive web applications using ReactJS and Redux, featuring dynamic interfaces and seamless API integrations tailored to client requirements.
 - Designed and maintained the **Distributor Management System**, improving distributor data handling efficiency through ReactJS and Redux Libraries.
 - Streamlined distributor data management with the **Dorf Ketal Company Dashboard**, providing secure state-wide access for company personnel.
 - Built the **Salesman Ticket System** to enable salesmen to raise and track DKSETU mobile app queries efficiently, enhancing issue resolution times.
 - Collaborated with cross-functional teams to ensure high-quality, bug-free delivery of software.

INTERNSHIPS

- Exposys Data Labs** **Nov 21 - Feb 22**
 - developed an attractive and responsive website using HTML, CSS, and JavaScript, enhancing user experience and overall functionality

PROJECT UNDERTAKEN

E-Book Library System

- Developed a user-friendly e-book library system using PHP, HTML, CSS, and JavaScript, featuring secure login, book categorization, search functionality, and an option for users to buy books.

Gym Management System

- Created a comprehensive GYM Management System using PHP, HTML, CSS, and JavaScript. The system included functionalities for managing memberships, scheduling, and processing payments

Staff Leave System

- Developed a staff leave management system using Node.js, HTML, CSS, MongoDB, and JavaScript with leave scheduling functionality

Leave Application System

- Developed a Leave Application System using PHP Laravel, HTML, CSS, and JavaScript, with tracking and approval features for leave requests
