PROFESSIONAL SUMMARY

Detail-oriented React.js and React Native Developer with 2+ years of experience in building scalable, high-performance web and mobile applications. Proficient in developing user-friendly interfaces, integrating APIs, and optimizing application performance to enhance user experience. Skilled in state management (Redux), component-based architecture, and responsive UI design. Experienced in CI/CD pipelines, ensuring smooth deployment and automation of development workflows. Adept at working in Agile environments, collaborating with cross-functional teams, and following best coding practices to deliver robust and efficient solutions. Passionate about building intuitive and scalable applications in fast-paced development cycles.

SKILLS

- **Programming Languages:** JavaScript (ES6+), HTML, CSS
- **Frameworks/ Libraries:** React.js, React Native, Redux, Bootstrap, Figma, Material-UI
- **Version Control/Tools:** Git, GitLab, VS Code
- **Operating Systems:** Windows, Linux
- **API & Backend Integration:** RESTful APIs, Axios
- **Additional Skills:** Unit Testing, API Testing (Postman), React Hooks, React Router, Asynchronous JavaScript

PROFESSIONAL EXPERIENCE

Software Engineer

STARLINK TECHNOLOGY OPC PVT. LTD. | Feb 2023 - Present

- Developed and maintained React.js and React Native applications, ensuring optimal performance and scalability.
- Designed and implemented reusable components using React.js, improving development efficiency.
- Integrated RESTful APIs for seamless data fetching and state management.
- Utilized Redux for efficient application state management.
- Design React Native applications for performance, ensuring smooth mobile experiences.
- Debugged and troubleshoot application issues using Chrome DevTools and React Developer Tools.
- Ensured code quality through unit testing and API testing using Postman.

PROJECTS

Project Tracking Monitoring System

- **Real-Time Work Progress Tracking:** Monitor and track physical and financial progress of work in real-time, allowing stakeholders to stay informed about project milestones, delays, and resource utilization.
- **Geo-Location Tracking:** Utilize GPS technology to capture the precise geo-location of project sites, along with latitude, longitude, and current date-time stamps.
- **Photo Documentation:** Enable the capture and storage of real project work progress photos, facilitating visual documentation of construction activities and project developments.

GPlanet

- GGCI stands for the Global Green Credit Initiative. It is for take care of the environment and make sure we use resources wisely. They do this by working together on different projects and sharing ideas to make the planet healthier and more sustainable for everyone
- Designed and implemented a responsive and user-friendly UI to showcase GGCI's initiatives and projects.
- Utilized React Router for smooth page transitions and a better user experience.

Setu App

- Developed a cross-platform mobile application using React Native for booking health tests, insurance services, government schemes, and agriculture e-commerce.
- Designed and implemented intuitive UI components to enhance user experience.

EDUCATION

BE/BTECH (Computer Engineering)

Savitribai Phule Pune University

2022

Final Year CGPA: 8.1

ADDITIONAL INFORMATION

- Strong analytical and problem-solving skills.
- Proven ability to work effectively in high-pressure environments.
- Excellent written and verbal communication skills.
